How to improve our ability about working skills [C1000-178](#) in specialized major, Then after confirming, we will refund you, A few moments are enough to introduce you to the excellent of the C1000-178 braindumps and the authenticity and relevance of the information contained in them.

C1000-178 Exam Torrent & C1000-178 Exam Preparation & C1000-178 Test Dumps

While accumulating these abundant knowledge and experience needs a lot of time, So far our passing rate of IBM C1000-178 exam training is high to 99.29%.

With all these versions, you can practice the C1000-178 learning materials at any time and condition as you like, And C1000-178 online test engine can definitely send you to triumph.

With it, you will be brimming with confidence, fully to **C1000-178 Exam Engine** do the exam preparation, If you fail the IBM Cognos Analytics Administrator v12 - Professional exam we will refund the full money to you unconditionally.

It is very convenient for you to use PDF real questions and answers, We are **C1000-178 Exam Engine** in the vortex of our modern world, only continuous effort we can adapt to the unceasing development society and get a place in the first team.

NEW QUESTION: 1 Find the probability that a leap year will contain 53 Tuesdays and 53 Wednesdays. **A.** 1/3 **B.** 2/7 **C.** 1/5 **D.** 1/7 **E.** 3/7 **Answer: D**

NEW QUESTION: 2 An organization uses Dynamics 365 Sales to manage customer relationships. When a potential customer submits an email inquiry, the system must create a lead record and send a response. You need to ensure that a lead record is created for the potential customer and a reply email is sent. How should you configure the environment? To answer, select the appropriate options in the answer area. **NOTE** Each correct selection is worth one point.

Answer: Explanation: Explanation

NEW QUESTION: 3 **HOTSPOT** Resources must authenticate to an identity provider. You need to configure the Azure Access Control service. What should you recommend? To answer, select the appropriate responses for each requirement in the answer area. **Answer:** Explanation: Explanation: Box 1: * Token - A user gains access to an RP application by presenting a valid token that was issued by an authority that the RP application trusts. * Identity Provider (IP) - An authority that authenticates user identities and issues security tokens, such as Microsoft account (Windows Live ID), Facebook, Google, Twitter, and Active Directory. When Azure Access Control (ACS) is configured to trust an IP, it accepts and validates the tokens that the IP issues. Because ACS can trust multiple IPs at the same time, when your application trusts ACS, you can your application can offer users the option to be authenticated by any of the IPs that ACS trusts on your behalf. Box 2: WS-Trust is a web service (WS-*) specification and Organization for the Advancement of Structured Information Standards (OASIS) standard that deals with the issuing, renewing, and validating of security tokens, as well as with providing ways to establish, assess the presence of, and broker trust relationships between participants in a secure message exchange. Azure Access Control (ACS) supports WS-Trust 1.3. **Incorrect:** ACS does not support Kerberos. **References:**

NEW QUESTION: 4 You are deploying a custom Windows 7 system image to a new computer. You perform the following tasks: -Start the new computer by using the Windows Preinstallation Environment (Windows PE) -Connect to a shared network location that contains the Windows 7 image file You need to apply the Windows 7 image to the computer. What should you do before you apply the image? **A.** Mount the image. **B.** Configure Windows Firewall. **C.** Initialize the Boot Configuration Data (BCD) store. **D.** Configure and format the hard disk drive. **Answer: D** Explanation: Deploying from a Network Share After you have imaged your reference installation, you can deploy the image onto new hardware (one or more destination computers). To access a network share as an installation source from the client computer, you need to boot the client computer into the Windows Preinstallation Environment (Windows PE) environment. The Windows PE environment is a minimally featured operating system that allows you to access diagnostic and maintenance tools as well as access network drives. To deploy an image from a network share, you use the Diskpart tool to format the hard drive of a destination computer. Then you copy the image from the network share and begin the installation by running Setup.exe.
