As for our guaranteed pass policy, our products are too good a change to miss for ambitious people.

Then they will fall into thoughts to try their best to answer the questions of the C1000-172 real exam, Our exercises and answers and are very close true examination questions.

We are also providing guaranteed success and after using C1000-172 practice exam questions, you will be able to clear the IBM C1000-172 test on the first attempt.

NEW QUESTION: 1 You have a pipeline that contains an input dataset in Microsoft Azure Table Storage and an output dataset in Azure Blob storage. You have the following JSON data. Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the JSON data. NOTE: Each correct selection is worth one point.

Answer: Explanation: Explanation Box 1: Every three days at 10.00 anchorDateTime defines the absolute position in time used by the scheduler to compute dataset slice boundaries.

"frequency": "<Specifies the time unit for data slice production. Supported frequency: Minute, Hour, Day, Week, Month>", "interval": "<Specifies the interval within the defined frequency. For example, frequency set to 'Hour' and interval set to 1 indicates that new data slices should be produced hourly> Box 2: Every minute up to three times. retryInterval is the wait time between a failure and the next attempt. This setting applies to present time. If the previous try failed, the next try is after the retryInterval period. Example: 00:01:00 (1 minute) Example: If it is 1:00 PM right now, we begin the first try. If the duration to complete the first validation check is 1 minute and the operation failed, the next retry is at 1:00 + 1min (duration) + 1min (retry interval) = 1:02 PM. For slices in the past, there is no delay. The retry happens immediately. retryTimeout is the timeout for each retry attempt. maximumRetry is the number of times to check for the availability of the external data.

NEW QUESTION: 2 Which three of these are functions of the Cisco TelePresence Management Suite? (Choose three.) A. intelligent call routing engine B. tracing SIP and H.323 calls C. automatic software update and release keys D. provisioning a Cisco TelePresence System endpoint E. rebooting endpoints that are registered to the Cisco TelePresence Video Communications Server F. managing phonebooks for endpoints that are registered to the Cisco Unified Cisco Unified Communications Manager **Answer: A, C, E** Explanation:

Explanation/Reference: Reference:

http://www.cisco.com/c/en/us/products/collateral/conferencing/telepresence-management-suite-tms/data_sheet_c78-707529.html Software upgrades ● Automated software upgrade helps ensure the latest software updates and release key retrieval for supported devices with minimal administrative intervention. ● Cisco TMS offers an administrator-defined schedule for bulk software upgrades of supported systems.
