As we all know, it's hard to delight every customer, Free demos are understandable and part of the ACP-120 Questions Jira Administrator exam materials as well as the newest information for your practice.

NEW QUESTION: 1 Which three benefits make a data center core Cisco Nexus 7010 Switch an effective solution? (Choose three.)**A.** support for 24-port Gb/s line card**B.** high availability**C.** support for data center service modules**D.** IP multicast**E.** high performance**F.** unified I/OG virtualization**Answer: B,E,F**

NEW QUESTION: 2 A user has forgotten their account password. Which of the following is the BEST recovery strategy?**A.** Upgrade the authentication system to use biometrics instead.**B.** Temporarily disable password complexity requirements.**C.** Set a temporary password that expires upon first use.**D.** Retrieve the user password from the credentials database.**Answer: C**
Explanation: Since a user's password isn't stored on most operating systems (only a hash value is kept), most operating systems allow the administrator to change the value for a user who has forgotten theirs. This new value allows the user to log in and then immediately change it to another value that they can (ideally) remember. Also setting a temporary password to expire upon first use will not allow a hacker the opportunity or time to use it.
Incorrect Answers: A. Using a biometric system is not going to recover a forgotten password. B. Disabling password complexity requirements is not a recovery strategy rather it would be compromising your password policy. D. This is not sound practice to keep user passwords on a credentials database since most operating systems store user passwords hashed and the administrator will be able to change the value for a user who has forgotten theirs. References: Dulaney, Emmett and Chuck Easton, CompTIA Security+ Study Guide, 6th Edition, Sybex, Indianapolis, 2014, pp. 140-141

NEW QUESTION: 3 One benefit of completing a descriptive analysis regarding a student's in-school behavior is that it:**A.** confirms hypotheses regarding functional relationships.**B.** allows the observer and student to develop rapport.**C.** may provide essential information not available through other means.**D.** frees the classroom teacher from having to spend too much

time collecting behavioral information.**Answer: C**
