**NEW QUESTION: 1**In which Scenario is the BGP Accumulated IGP feature required ?**A.** when the bandwidth is available on each of the core links is mapped to the OSPF cost and BGP is required to carry this information of the PE devices simulating the OSPF behavior of computing the distance associated with the path.**B.** When a more granular approach is required to effectively construct instruction to match a particular flow with source and destination in order to mitigate DDoS which remotetriggered blackhole technique is not able to provide.**C.** When BGP Link-State feature is enabled and it is required for BGP link state data to be downloaded to another component to the router.**D.** When multipaths are available and the cost community is required to influency the BGP best path selection process at the point of insersation .**Answer: A**

**NEW QUESTION: 2**Which command encrypts all plaintext passwords?**A.** Router# service password-encryption**B.** Router(config)# service password-encryption**C.** Router(config)# password-encryption**D.** Router# password-encryption**Answer: B****Explanation:** Explanation/Reference:Explanation:The "service password-encryption" command allows you to encrypt all passwords on your router so they cannot be easily guessed from your running-config. This command uses a very weak encryption because the router has to be very quickly decode the passwords for its operation. It is meant to prevent someone from looking over your shoulder and seeing the password, that is all. This is configured in global configuration mode.

**NEW QUESTION: 3**Consider the following command:./patchmgr -cells dm01 -patch -rolling Which two actions does this command perform? (Choose two.)**A.** upgrades one or more Exadata Storage Servers simultaneously**B.** upgrades an Exadata Storage Server named dm01**C.** rolls back one or more Exadata Storage Servers to the previous release**D.** upgrades one or more Exadata Storage Servers, one at a time**E.** upgrades one or more Exadata Storage Servers listed in the dm01 file**F.** upgrades one or more Exadata Storage Servers and InfiniBand Switches  
**Answer: A,B**
