NEW QUESTION: 1Hinweis: Diese Frage ist Teil einer Reihe von Fragen, die dasselbe Szenario darstellen. Jede Frage in der Reihe enthält eine eindeutige Lösung, mit der die angegebenen Ziele erreicht werden können. Einige Fragensätze haben möglicherweise mehr als eine richtige Lösung, während andere möglicherweise keine richtige Lösung haben.Nachdem Sie eine Frage in diesem Abschnitt beantwortet haben, können Sie NICHT mehr darauf zurückgreifen. Infolgedessen werden diese Fragen nicht im Überprüfungsbildschirm angezeigt.Sie haben einen Laptop mit dem Namen Computer1, auf dem Windows 10 ausgeführt wird.In Reichweite stellt Computer1 automatisch eine Verbindung zu einem Wi-Fi-Netzwerk mit dem Namen Wireless1 her.Sie müssen verhindern, dass Computer1 automatisch eine Verbindung zu Wireless1 herstellt.Lösung: In der Dienstkonsole deaktivieren Sie den Link Layer Topology Discovery Mapper-Dienst.Erfüllt dies das Ziel?**A. Ja****B. Nein****Answer: B**Explanation:Topic 1, Fabrikam, Inc.Overview Existing EnvironmentFabrikam, Inc. is a distribution company that has 500 employees and 100 contractors.Active DirectoryThe network contains an Active Directory forest named fabrikam.com. The forest is synced to Microsoft Azure Active Directory (Azure AD). All the employees are assigned Microsoft 365 E3 licenses.The domain contains a user account for an employee named User10.Client ComputersAll the employees have computers that run Windows 10 Enterprise. All the computers are installed without Volume License Keys. Windows 10 license keys are never issued.All the employees register their computer to Azure AD when they first receive the computer.User10 has a computer named Computer10.All the contractors have their own computer that runs Windows 10. None of the computers are joined to Azure AD.Operational ProceduresFabrikam has the following operational procedures:Updates are deployed by using Windows Update for Business.When new contractors are hired, administrators must help the contactors configure the following settings on their computer:- User certificates- Browser security and proxy settings- Wireless network connection settings Security policiesThe following security policies are enforced on all the client computers in the domain:* All the computers are encrypted by using BitLocker Drive Encryption (BitLocker). BitLocker recovery information is stored in Active Directory and Azure AD.* The local Administrators group on each computer contains an enabled account named LocalAdmin.* The LocalAdmin account is managed by using Local Administrator Password Solution (LAPS).Problem StatementsFabrikam identifies the following issues:* Employees in the finance department use an application named Application1. Application1 frequently crashes due to a memory error. When Application1 crashes, an event is written to the application log and an administrator runs a script to delete the temporary files and restart the application.* When employees attempt to connect to the network from their home computer, they often cannot establish a VPN connection because of misconfigured VPN settings.* An employee has a computer named Computer11. Computer11 has a hardware failure that prevents the computer from connecting to the network.* User10 reports that Computer10 is not activated.Technical RequirementsFabrikam identifies the following technical requirements for managing the client computers:* Provide employees with a configuration file to configure their VPN connection.* Use the minimum amount of administrative effort to implement the technical requirements.* Identify which employees' computers are noncompliant with the Windows Update baseline of the company.* Ensure that the service desk uses Quick Assist to take remote control of an employee's desktop during support calls.* Automate the configuration of the contractors' computers. The solution must provide a configuration file that the contractors can open from a Microsoft SharePoint site to apply the required configurations.

NEW QUESTION: 2You are the business analyst for your organization. A customer has approached your organization and is requesting that your company create new software for them that will help them collect customer information. In regard to enterprise analysis this business needs stems from which one of the following need generation approaches?**A. External drivers****B. Top-down****C. Bottom-up****D. Middle management****Answer: A**

NEW QUESTION: 3Which of the following is less likely to accompany a contingency plan, either within the plan itself or in the form of an appendix?**A. Vendor contact information, including offsite storage and alternate site.****B. Contact information for all personnel.****C. Equipment and system requirements lists of the hardware, software, firmware and other resources required to support system operations.****D. The Business Impact Analysis.****Answer: B****Explanation:**
Explanation/Reference:Explanation:Contact information for all personnel is not required. Contact information is required for specific vendors, emergency agencies, offsite facilities, and any other entity that may need to be contacted in a time of need.Incorrect Answers:B: Contact information is required for specific vendors, emergency agencies, offsite facilities, and any other entity that may need to be contacted in a time of need.C: Documentation of the current system must be incorporated in the contingency plan. This documentation should include equipment and system requirements lists of the hardware, software, firmware and other resources required to support system operations.D: A vital part of a contingency plan is to conduct the business impact analysis (BIA).References:Harris, Shon, All In One CISSP Exam Guide, 6th Edition, McGraw-Hill, 2013, pp. 890, 931
