**NEW QUESTION:** 1Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time. When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design. Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task. Labs are not timed separately, and this exam may more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided. Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab. Username and password Use the following login credentials as needed: To enter your username, place your cursor in the box and click on the username below. To enter your password, place your cursor in the box and click on the password below. Microsoft 365 Username: [\[email&#160;protected\]](#) Microsoft 365 Password: sc43@EMt

The following information is for technical support purposes only: Lab Instance: 11024416 You need to prevent users from enabling offline access from Outlook on the web. To complete this task, sign in to the Microsoft 365 admin center. **Answer:** Explanation: See explanation below Explanation You need to modify the default Outlook Web App policy. 1. Go to the Exchange Admin Center. 2. Click on Permissions in the left

navigation pane.3. Click on Outlook Web App policies.4. Select the default policy and click the Edit icon (pencil icon).5. Select Offline Access on the left of the policy settings page.6. Under 'Enable offline access', select 'Never'.7. Click Save to save the changes.

**NEW QUESTION: 2** Refer to the exhibit. A financial company is adopting micro-services with the intent of simplifying network security. An NSX-T architect is proposing a NSX-T Data Center micro-segmentation logical design. The architect has created a diagram to share with the customer. How many security levels will be implemented according to this Logical Design?  
**A.** 4 Levels  
**B.** 2 levels  
**C.** 6 levels  
**D.** 9 Levels  
**Answer: A**  
**Explanation:** Explanation Z - \* Each circle in this design is a "level" starting at the most granular level which is the sub-component of the app (web, db, or app), then risk level (high, med, low) then deployment zone (prod, dev, test) and then finally infrastructure services level\*
