Our Oracle Planning and Collaboration Cloud 2024 Implementation Professional training vce is affordable, latest [CORe Accurate Study Material](#) and best quality with detailed answers, which can overcome the difficulty of real exam.

NEW QUESTION: 1 Which two statements are correct in relation to a completed bill that has been generated by batch billing? (Choose two.)
A. Only the latest completed bill may be reopened.
B. The number of completed bills that may be reopened is configurable.
C. A Route Type on a bill can be changed if the completed bill has not been downloaded.
D. Bill Segments can only be canceled or rebilled if a completed bill has been reopened.
E. A Bill Route record contains the list of all persons who are to receive a copy of the completed bill.
Answer: D, E
Explanation: Reference:

https://docs.oracle.com/cd/E28945_01/4.2%20Manage%20Device%20Measurements%20and%20Bill%20Customers/CC&B%20URM%204.2.2.6.pdf

NEW QUESTION: 2 The Project Manager is creating an estimate for building a company WAN (wide area network). It is something that is new to the Project Manager and his team, and they want to make sure all the work of the project is covered. They decide to create a bottom-up estimate. All of the following are advantages of this type of estimate except...
A. It provides team buy-in when they help create it
B. It takes a great amount of time to create
C. It provides supporting detail of the estimate
D. It has a greater degree of accuracy because of the detail at which it was created
Answer: B

NEW QUESTION: 3 Which statements are true about EIGRP successor routes? (Choose two.)
A. A successor route may be backed up by a feasible successor route.
B. Successor routes are flagged as 'active' in the routing table.
C. Successor routes are stored in the neighbor table following the discovery process.
D. A successor route is used by EIGRP to forward traffic to a destination.
E. Successor routes are saved in the topology table to be used if the primary route fails.
Answer: A, D
Explanation: Explanation/Reference: Explanation: Introduction to EIGRP Feasible Successors A destination entry is moved from the topology table to the routing table when there is a feasible successor. All minimum cost paths to the destination form a set. From this set, the neighbors that have an advertised metric less than the current routing table metric are considered feasible successors. Feasible successors are viewed by a router as neighbors that are downstream with respect to the destination. These neighbors and the associated metrics are placed in the forwarding table. When a neighbor changes the metric it has been advertising or a topology change occurs in the network, the set of feasible successors may have to be re-evaluated. However, this is not categorized as a route recomputation. Reference: http://www.cisco.com/en/US/tech/tk365/technologies_tech_note09186a0080093f07.shtml
