We are UK based company, selling practice test questions answers.

NEW QUESTION: 1A company is using Amazon DynamoDB to stage its product catalog which is 1 GB. Since a product entry on average consists of 100 KB of data, and the average traffic is about 250 requests per second, the database administrator has provisioned 3,000 RCUs of read capacity throughput. However, some products are very popular and users are experiencing delays or timeouts due to throttling. What improvement offers a long-term solution to this problem?
A. Use Amazon DynamoDB Accelerator to maintain the frequently read items
B. Augment Amazon DynamoDB by storing only the key product attributes, with the details stored on Amazon S3
C. Increase the throughput provisioning to 6,000 read capacity units (RCUs)
D. Change the partition key to consist of a hash of product key and product type instead of just the product key
Answer: A

NEW QUESTION: 2A. Option B
B. Option C
C. Option A
D. Option D
Answer: A

NEW QUESTION: 3There are two distinct lists of grades that should be available in two separate business units of your organization. During testing, you notice that the lists of grades between the two business units are not per the requirement. Indicate what has gone wrong in the setup.
A. The grade rate of the two business units have been interchanged
B. The grade sets of the two business units have been interchanged
C. Incorrect grade ladder is attached to the two business units
D. All grades are available at enterprise level only
Answer: B
Explanation: Grades and Sets enable you to share grades that are common across business units in your enterprise. You can assign grades to either a specific set or to the common set to each grade. If you assign the grade to the common set, then the grade is available for use in all business units.

Note:*grade rateUsed to define pay values for grades in a legislative data group.Reference:
