NEW QUESTION: 1A customer is having issues with enterprise-wide data and device management. The sales person plans to propose IBM Spectrum Control to enable a single-point of management of the underlying hardware.Which IBM solution provides these core capabilities?**A.** Virtual Storage Center**B.** DS8870**C.** Storwize V3700**D.** XIV**Answer: A**

NEW QUESTION: 2While reviewing a bug in Microsoft Test Manager (MTM), you realize there is no test case covering the bug.You need to create a test case from the bug, including test steps, and associate it with the test case for future reference.What should you do?**A.** In MTM, in the Verify Bugs activity, select the bug. Click Open test case.**B.** In MTM, in the Verify Bugs activity, select the bug. Click Create test case from bug.**C.** Open a Visual Studio 2012 window. Create a test case and associate it with the bug.**D.** Open a Visual Studio 2012 window. Select the bug and click Open test case.**Answer: B**

NEW QUESTION: 3Drag and Drop QuestionYou receive revenue data that must be included in Microsoft Power BI reports. You perform an initial load of the data from a Microsoft Excel source as shown in the following exhibit.You plan to create several visuals from the data, including a visual that shows revenue split by year and product.You need to transform the data to ensure that you can build the visuals. The solution must ensure that the columns are named appropriately for the data that they contain.Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation:

NEW QUESTION: 4Your infrastructure divided in 2 sites. You have a forest root domain and child domain.There is only one DC on site 2 with no FSMO roles. The link goes down to site 2 and no users can log on. What FSMO roles you need on to restore the access?**A.** RID master**B.** Domain Naming master**C.** PDC Emulator**D.** Infrastructure master**Answer: C**Explanation:D. The PDC emulator is used as a reference DC to double-check incorrect passwords and it also receives new password changes.PDC Emulator is the most complicated and least understood role, for it runs a diverse range of critical tasks. It is a domain-specific role, so exists in the forest root domain and every child domain. Password changes and account lockouts are immediately processed at the PDC Emulator for a domain, to ensure such changes do not prevent a user logging on as a result of multi-master replication delays, such as across Active Directory sites.
