What should you configure?  
**A.** The Data Manager settings of DCS1  
**B.** A File Server Resource Manager (FSRM) file screen on the C:\Logs folder  
**C.** A schedule for DCS1  
**D.** A File Server Resource Manager (FSRM) quota on the C:\Logs folder  
**Answer: A**  
**Explanation:** To configure data management for a Data Collector Set:  
1. In Windows Performance Monitor, expand Data Collector Sets and click User Defined.  
2. In the console pane, right-click the name of the Data Collector Set that you want to configure and click Data Manager.

When Minimum free disk or Maximum folders is selected, previous data will be deleted according to the Resource policy you choose (Delete largest or Delete oldest) when the limit is reached. When Apply policy before the data collector set starts is selected, previous data will be deleted according to your selections before the data collector set creates its next log file. When Maximum root path size is selected, previous data will be deleted according to your selections when the root log folder size limit is reached.
