**NEW QUESTION: 3****Answer:** Explanation:ExplanationBox 1: Azure VPN GatewayScenario: You must isolate network traffic from the internet to the Azure SQL Database.A VPN gateway is a specific type of virtual network gateway that is used to send encrypted traffic between an Azure virtual network and an on-premises location over the public Internet. You can also use a VPN gateway to send encrypted traffic between Azure virtual networks over the Microsoft network.  
Box 2: Virtual Network Service EndpointVirtual network rules are one firewall security feature that controls whether your Azure SQL Database or SQL Data Warehouse server accepts communications that are sent from particular subnets in virtual networks. To create a virtual network rule, there must first be a virtual network service endpoint for the rule to reference.  
Scenario:The Azure SQL Database must have a direct connection from the virtual network.
