NEW QUESTION: 1 During which of the following NIST risk management framework steps would an information system security engineer identify inherited security controls and tailor those controls to the system?
A. Assess
B. Select
C. Implement
D. Categorize
Answer: D

NEW QUESTION: 2 A customer wants to ensure that any previously processed data changes on certain infotypes are taken into account in the next payroll processing run. Which settings should be made on V_T582A (Infotype Attributes)?
A. Set the List Time Periods indicator to record changes in previous periods.
B. Set the Time Constraint indicator to allow for processing changes from previous periods.
C. Set the Entry Before Earliest Retroactive Accounting Date indicator to allow for processing changes from previous periods.
D. Set the Retroactive Accounting Relevance indicator to allow for processing changes from previous periods.
Answer: D

NEW QUESTION: 3 Which of the following is a requirement when implementing PKI if data loss is unacceptable?
A. Key escrow
B. Non-repudiation
C. Certificate revocation list
D. Web of trust
Answer: A
Explanation: Section: Cryptography
Explanation/Reference: Explanation: Key escrow is a database of stored keys that later can be retrieved. Key escrow addresses the possibility that a third party may need to access keys. Under the conditions of key escrow, the keys needed to encrypt/decrypt data are held in an escrow account (think of the term as it relates to home mortgages) and made available if that third party requests them. The third party in question is generally the government, but it could also be an employer if an employee's private messages have been called into question.

NEW QUESTION: 4 Which of the following statements are true about audit findings? Each correct answer represents a complete solution. Choose all that apply.
A. Audit findings is described as dutifulness, obligingness, pliability, tolerance, and treatability.
B. Audit findings involve contracting out of a business function to an external provider/buyer.
C. The effective audit findings is designed to mitigate incomplete findings, as well as those that do not meet the intent of the process approach, have missing criteria or have incomplete objective evidence.
D. Audit findings are an effective method to facilitate the necessary improvements within a quality management system.
Answer: C, D
Explanation: Audit findings are an effective method to facilitate the necessary improvements within a quality management system. The Effective Audit Findings is designed to mitigate incomplete findings, as well as those that do not meet the intent of the process approach, have missing criteria or have incomplete objective evidence. It helps organization in improving how it receives and interprets findings from second- and third-party auditors with the ultimate objective of quality management system

improvement. Answer option A is incorrect. Compliance is described as dutifulness, obligingness, pliability, tolerance, and tractability. Compliance means that an organization must take care of the organization's internal regulations, as well as follow the laws of the country and requirements of local legislation and regulations. Answer option B is incorrect. Outsourcing is the term which is used to define the process of contracting a business function to someone else. It involves contracting out of a business function to an external provider/buyer.
