We guarantee our C-SIGPM-2403 study materials can actually help you clear your exams.

NEW QUESTION: 1 SZENARIO Bitte verwenden Sie Folgendes, um die nächste Frage zu beantworten: Building Block Inc. ist ein multinationales Unternehmen mit Hauptsitz in Chicago und Niederlassungen in den USA, Asien und Europa (einschließlich Deutschland, Italien, Frankreich und Portugal). Letztes Jahr war das Unternehmen Opfer eines Phishing-Angriffs, der zu einem erheblichen Datenverstoß führte. Der Vorstand beschloss in Abstimmung mit dem Geschäftsführer, seinem Datenschutzbüro und dem Informationssicherheitsteam, zusätzliche Sicherheitsmaßnahmen zu ergreifen. Dazu gehörten Schulungsaufklärungsprogramme, ein Cybersicherheitsaudit und die Verwendung eines neuen Softwaretools namens SecurityScan, mit dem die Computer der Mitarbeiter überprüft werden, um festzustellen, ob sie über Software verfügen, die nicht mehr von einem Anbieter unterstützt wird und daher keine Sicherheitsupdates erhält. Diese Software bietet jedoch auch andere Funktionen, einschließlich der Überwachung der Computer der Mitarbeiter. Da sich diese Maßnahmen möglicherweise auf die Mitarbeiter auswirken würden, hat das Datenschutzbüro von Building Block beschlossen, allen Mitarbeitern einen allgemeinen Hinweis zukommen zu lassen, in dem darauf hingewiesen wird, dass das Unternehmen eine Reihe von Initiativen zur Verbesserung der Informationssicherheit und zur Verhinderung künftiger Datenschutzverletzungen durchführen wird. Nach der Implementierung dieser Maßnahmen nahm die Serverleistung ab. Der General Manager wies das Sicherheitsteam an, wie mit SecurityScan die Computeraktivität der Mitarbeiter und ihr Standort überwacht werden können. Während dieser Aktivitäten stellte das Informationssicherheitsteam fest, dass ein Mitarbeiter aus Italien täglich eine Verbindung zu einer Videobibliothek mit Filmen herstellte und ein anderer aus Deutschland ohne Genehmigung remote arbeitete. Das Sicherheitsteam meldete diese Vorfälle dem Datenschutzbüro und dem General Manager. In ihrem Bericht kam das Team zu dem Schluss, dass der Mitarbeiter aus Italien der Grund für die Abnahme der Serverleistung war. Aufgrund der Schwere dieser Verstöße beschloss das Unternehmen, Disziplinarmaßnahmen gegen beide Mitarbeiter anzuwenden, da die Sicherheits- und Datenschutzrichtlinien des Unternehmens es den Mitarbeitern untersagten, Software auf den Computern des Unternehmens zu installieren und ohne Genehmigung remote zu arbeiten. Wie würde Building Block am besten mit dem Mitarbeiter aus Italien umgehen? **A.** Da die DSGVO auf diese Situation nicht anwendbar ist, wäre

das Unternehmen berechtigt, alle nach italienischem Arbeitsrecht genehmigten Disziplinarmaßnahmen anzuwenden.**B.** Da der Mitarbeiter die Ursache für ein ernstes Risiko für die Serverleistung und ihre Daten war, wäre das Unternehmen berechtigt, Disziplinarmaßnahmen gegen diesen Mitarbeiter anzuwenden, einschließlich einer fairen Entlassung.**C.** Da der Mitarbeiter nicht darüber informiert wurde, dass die Sicherheitsmaßnahmen für andere Zwecke wie die Überwachung verwendet werden, könnte das Unternehmen Schwierigkeiten haben, Disziplinarmaßnahmen auf diesen Mitarbeiter anzuwenden.**D.** Da dies ein schwerwiegender Verstoß war, der Mitarbeiter jedoch nicht angemessen über die Folgen der neuen Sicherheitsmaßnahmen informiert wurde, wäre das Unternehmen berechtigt, einige Disziplinarmaßnahmen anzuwenden, jedoch keine Entlassung.

Answer: D

NEW QUESTION: 2What is a key advantage of a content management system?**A.** It is a management system for distributed computer environments.**B.** It provides the possibility to connect to multiple web-sites without using a password.**C.** It distributes content to users.**D.** It reduces repetitive duplicate input.**Answer: D**

NEW QUESTION: 3A company wishes to enable Single Sign On (SSO) so its employees can login to the management console using their corporate directory identity. Which steps below are required as part of the process? Select 2 answers from the options given below. Please select:**A.** Create a Lambda function to assign IAM roles to the temporary security tokens provided to the users.**B.** Create an IAM role that establishes a trust relationship between IAM and the corporate directory identity provider (IdP) Create a Direct Connect connection so that corporate users can access the AWS account Option B is incorrect because IAM policies are not directly mapped to group memberships in the corporate directory. It is IAM roles which are mapped.**C.** Create IAM users that can be mapped to the employees' corporate identities**D.** Create a Direct Connect connection between on-premise network and AWS. Use an AD connector for connecting AWS with on-premise active directory.**E.** Create IAM policies that can be mapped to group memberships in the corporate directory.**Answer: B, D**Explanation:Option C is incorrect because Lambda functions is an incorrect option to assign roles.Option D is incorrect because IAM users are not directly mapped to employees' corporate identities.For more information on Direct Connect, please refer to below URL:' <https://aws.amazon.com/directconnect/>From the AWS Documentation, for federated access, you also need to ensure the right policy permissions are in place Configure permissions in AWS for your federated users The next step is to create an IAM role that establishes a trust relationship between IAM and your organization's IdP that identifies your IdP as a principal (trusted entity) for purposes of federation. The role also defines what users authenticated your organization's IdP are allowed to do in AWS. You can use the IAM console to create this role. When you create the trust policy that indicates who can assume the role, you specify the SAML provider that you created earlier in IAM along with one or more SAML attributes that a user must match to be allowed to assume the role. For example, you can specify that only users whose SAML eduPersonOrgDN value is ExampleOrg are allowed to sign in. The role wizard automatically adds a condition to test the saml:aud attribute to make sure that the role is assumed only for sign-in to the AWS Management Console. The trust policy for the role might look like this:For more information on SAML federation, please refer to below URL:https://docs.aws.amazon.com/IAM/latest/UserGuide/id_roles_providers_enableNote:What directories can I use with AWS SSO?You can connect AWS SSO to Microsoft Active Directory, running either on-premises or in the AWS Cloud. AWS SSO supports AWS Directory Service for Microsoft Active Directory, also known as AWS Managed Microsoft AD, and AD Connector. AWS SSO does not support Simple AD. See AWS Directory Service Getting Started to learn more.To connect to your on-premises directory with AD Connector, you need the following:VPCSet up a VPC with the following:* At least two subnets. Each of the subnets must be in a different Availability Zone.* The VPC must be connected to your on-premises network through a virtual private network (VPN) connection or AWS Direct Connect.* The VPC must have

default hardware tenancy.* <https://aws.amazon.com/single-sign-on/>*
<https://aws.amazon.com/single-sign-on/faqs/>* <https://aws.amazon.com/blog/using-corporate-credentials/>* <https://docs.aws.amazon.com/directoryservice/latest/admin->
The correct answers are: Create a Direct Connect connection between on-premise network and AWS. Use an AD connector connecting AWS with on-premise active directory.. Create an IAM role that establishes a trust relationship between IAM and corporate directory identity provider (IdP) Submit your Feedback/Queries to our Experts

NEW QUESTION: 4次のうちどれがリスク管理フレームワークではありませんか？**A. COBIT****B. ISO 31000** : 2009**C. NIST SP 800-37****D. Hex GBL****Answer: D**
Explanation:Hex GBL is a reference to a computer part in Terry Pratchett's fictional Discworld universe. The rest are not.
