NEW QUESTION: 1The value of the City property must be copied from the ShippingAddress page to the BillingAddress page in a case, using a data transform. Identify the correct syntax to reference the target property.**A.** ShippingAddress.City**B.** BillingAddress.City **C.** BillingAddress.City**D.** City**Answer: A**

NEW QUESTION: 2You administer a Microsoft SQL Server 2012 database.All database traffic to the SQL Server must be encrypted by using secure socket layer (SSL) certificates or the connection must be refused.Network administrators have deployed server certificates to the Windows store of all Windows servers on the network from a trusted Certificate Authority. This is the only Certificate Authority allowed to distribute certificates on the network.You enable the Force Encryption flag for the MSSQLServer protocols, but client computers are unable to connect. They receive the following error message:"A connection was successfully established with the server, but then an error occurred during the pre-login handshake. (provider: SSL Provider, error: 0 - The certificate chain was issued by an authority that is not trusted.) (Microsoft SQL Server)" You notice the following entry in the SQL Server log:"A self-generated certificate was successfully loaded for encryption."You need to configure SQL Server to encrypt all client traffic across the network.You also need to ensure that client computers are able to connect to the server by using a trusted certificate.Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)**Answer:** Explanation:ExplanationReferences:

NEW QUESTION: 3You administer a Microsoft SQL Server 2016 server that hosts a transactional database and a reporting database.The transactional database is updated through a web application and is operational throughout the day.The reporting database is only updated from the transactional database.The recovery model and backup schedule are configured as shown in the following table:At 16:20 hours, you discover that pages 17, 137, and 205 on one of the database files are corrupted on the transactional database. You need to ensure that the transactional database is restored. You also need to ensure that data loss is minimal.What should you do?**A.** Restore the latest full backup.**B.** Restore the latest full backup, and restore

the latest differential backup. Then, restore each log backup taken before the time of failure from the most recent differential backup.**C.** Restore the latest full backup, and restore the latest differential backup. Then, restore the latest log backup.**D.** Restore the latest full backup. Then, restore each differential backup taken before the time of failure from the most recent full backup.**E.** Perform a point-in-time restore.**F.** Perform a page restore.**G.** Restore the latest full backup. Then, restore the latest differential backup.**H.** Perform a partial restore.**Answer: F**
Explanation: The goal of a page restore is to restore one or more damaged pages without restoring the whole database. Typically, pages that are candidates for restore have been marked as "suspect" because of an error that is encountered when accessing the page.
Note: Requirements for Restoring Pages
A page restore is subject to the following requirements:
The databases must be using the full or bulk-logged recovery model.
Etc.

NEW QUESTION: 4 You have just received some room and WiFi access control recommendations from a security consulting company. Click on each building to bring up available security controls. Please implement the following requirements:
The Chief Executive Officer's (CEO) office had multiple redundant security measures installed on the door to the office. Remove unnecessary redundancies to deploy three-factor authentication, while retaining the expensive iris reader.
The Public Cafe has wireless available to customers. You need to secure the WAP with WPA and place a passphrase on the customer receipts.
In the Data Center you need to include authentication from the "something you know" category and take advantage of the existing smartcard reader on the door.
In the Help Desk Office, you need to require single factor authentication through the use of physical tokens given to guests by the receptionist.
The PII Office has redundant security measures in place. You need to eliminate the redundancy while maintaining three-factor authentication and retaining the more expensive controls.
Instructions: The original security controls for each office can be reset at any time by selecting the Reset button. Once you have met the above requirements for each office, select the Save button. When you have completed the entire simulation, please select the Done button to submit. Once the simulation is submitted, please select the Next button to continue.
