**NEW QUESTION: 1** During the evaluation of user feedback from usability testing of a web site project, it is determined that users typically get lost within the site, get confused by "mystery meat" graphical links and are not able to complete tasks as directed. Which of the following UI design patterns would help correct this issue? **A.** Navigation tabs **B.** Image zoom **C.** Progressive disclosure **D.** Navigation wizards **Answer: A**

**NEW QUESTION: 2** List down the elements involved in User Management and Security in SAP HANA? There are 3 correct answers to this question **A.** Create users **B.** Manage users **C.** Assign job security **D.** Assign security **E.** Work management **Answer: A,B,D**

**NEW QUESTION: 3** An experiment was done in which human subjects recognize a pattern within a matrix of abstract designs and then select another design that completes that pattern. The results of the experiment were surprising. The lowest expenditure of energy in neurons in the brain was found in those subjects who performed most successfully in the experiments. Which of the following hypotheses best accounts for the findings of the experiment? **A.** Those who performed best in the experiment experienced more satisfaction when working with abstract patterns than did those who performed less well. **B.** The task of completing a given design is more capably performed by athletes, whose energy expenditure is lower when they are at rest than is that of the general population. **C.** The neurons of the brain react less when a subject is trying to recognize patterns than when the subject is doing other kinds of reasoning. **D.** People who are better at abstract pattern recognition have more energy-efficient neural connections. **E.** The energy expenditure of the subjects brains increases when a design that completes the initially recognized pattern is determined. **Answer: C** Explanation: Explanation/Reference: Explanation:
