NEW QUESTION: 2DRAG DROPYou need to recommend data storage mechanisms for the solution.What should you recommend? To answer, drag the appropriate data storage mechanism to the correct information type. Each data storage mechanism may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.**Answer:** Explanation:* Use Table storage for Contractor information* Use Blob for Project Images* Scenario: VanArsdel needs a solution to reduce the number of operations on the contractor information table. Currently, data transfer rates are excessive, and queue length for read/write operations affects performance./ A mobile service that is used to access contractor information must have automatically scalable, structured storage/ Images must be stored in an automatically scalable, unstructured form.Note: Blob is an acronym for Binary Large object. Basically Blob is a sequence of bytes - just what an application needs. Blob can hold audio, video, email messages, archived files, zip files or a word processing document in a very general way.References:
