To give the customer the best service, all of our company's ADA-C01 learning materials are designed by experienced experts from various field, so our ADA-C01 Learning materials will help to better absorb the test sites.

NEW QUESTION: 1A. Option B B. Option D C. Option C D. Option A **Answer: D** Explanation: A user can create a subnet with VPC and launch instances inside that subnet. If the user has created a public private subnet, the instances in the public subnet can receive inbound traffic directly from the internet, whereas the instances in the private subnet cannot. If these subnets are created with Wizard, AWS will create a NAT instance with an elastic IP. Wizard will also create two subnets with route tables. It will also create an internet gateway and attach it to the VPC.

NEW QUESTION: 2 Which three methods can be used to install an IBM Spectrum Protect server in a Linux environment? (Choose three.) A. The installation wizard B. Silent mode C. Operation mode D. Operations Center Install option E. The new DSMSERV INSTALL command F. Console mode **Answer: A, B, F** Explanation: Reference: https://www.ibm.com/support/knowledgecenter/en/SSEQVQ_8.1.0/srv.install/b_srv_install_guide_linux2.pdf

NEW QUESTION: 3 Which of the following is NOT a test control activity? A. Change the test schedule due to viability of a test environment B. Set an entry criterion requiring fixes to be retested by a developer before accepting them into a build C. Writing test suspension and resumption criteria in the test plan D. Re-prioritize tests because of time pressure **Answer: B**

NEW QUESTION: 4 Your network contains an Active Directory domain named contoso.com. All client computer accounts are in an organizational unit (OU) named AllComputers. Client computers run either Windows 7 or Windows 8. You create a Group Policy object (GPO) named GP1. You link GP1 to the AllComputers OU. You need to ensure that GP1 applies only to computers that have more than 8 GB of memory. What should you configure? A. The Block Inheritance option for AllComputers B. The Security settings of AllComputers C. The WMI filter for GP1 D. The Security settings of GP1 **Answer: C** Explanation: Explanation Windows Management Instrumentation (WMI) filters allow you to dynamically determine the scope of Group Policy objects (GPOs) based on attributes of the target computer. When a GPO that is linked to a WMI filter is applied on the target computer, the filter is evaluated on the target computer. If the WMI filter evaluates to false, the GPO is not applied (except if the client computer is running Windows Server, in which case the filter is ignored and the GPO is always applied). If the WMI filter evaluates to true, the GPO is applied. WMI filters, like GPOs, are stored on a per-domain basis. A WMI filter and the GPO it is linked to must be in the same domain. References: Training Guide: Installing and Configuring Windows Server 2012 R2: Chapter 10: Implementing Group Policy, p.470, 482 <http://technet.microsoft.com/en-us/library/jj134176> WMI filtering using GPMC
