Then you no longer need to worry about being fired by your boss, We have strong confidence in offering the first-class HPE7-A05 study prep to our customers.

NEW QUESTION: 1 A 28-year-old client comes to the clinic for her first prenatal examination. In relating her obstetrical history, she tells the nurse that she has been pregnant twice before. She had a "miscarriage" with the first pregnancy after 6 weeks. With the second pregnancy, she delivered twin girls at 31 weeks' gestation. One of the twins was stillborn and the other twin died at 4 days of age. Using a five-digit system, the nurse records her as being:**A. 2-1-1-0-0B. 3-0-1-1-0C. 2-0-2-1-0D. 2-2-2-1-2****Answer: B****Explanation:**Explanation/Reference:Explanation:(A) The first digit represents the total number of pregnancies. This client has been pregnant 3 times including this pregnancy. The twin pregnancy counts as only one pregnancy, and because she delivered prior to 37 weeks' gestation, the third digit is recorded as 1. (B) The first digit represents the total number of pregnancies. This client has been pregnant 3 times including this pregnancy. The second digit represents the total number of fullterm deliveries; she has lost two pregnancies before 37 weeks' gestation. At present, she has no living children, so the fifth digit is noted as 0. (C) The client is pregnant for the third time, and the first digit reflects the total number of pregnancies. She has had no full-term deliveries, because she delivered prior to 37 gestational weeks, so the second digit is recorded as 0. The third digit represents the number of preterm deliveries, and a twin pregnancy counts as only one delivery. She lost an earlier pregnancy prior to 20 gestational weeks, and the fourth digit reflects spontaneous or elective abortions. Lastly, the fifth digit indicates the number of children currently living, and she has no living children. (D) She is pregnant for the third time, and the first digit reflects the total number of pregnancies. In the previous two pregnancies, she delivered prior to 37 gestational weeks, thus having no full-term deliveries, which is indicated by the second digit. The fourth digit represents the total number of abortions, spontaneous or elective, and she reported a spontaneous abortion with her first pregnancy.

NEW QUESTION: 2 DRAG DROP---**Answer:** Explanation:

NEW QUESTION: 3 You support a high-traffic web application and want to ensure that the home page loads in a timely manner. As a first step, you decide to implement a Service Level

Indicator (SLI) to represent home page request latency with an acceptable page load time set to 100 ms. What is the Google-recommended way of calculating this SLI?**A.** Bucketize the request latencies into ranges, and then compute the percentile at 100 ms.**B.** Count the number of home page requests that load in under 100 ms. and then divide by the total number of all web application requests.**C.** Bucketize the request latencies into ranges, and then compute the median and 90th percentiles.**D.** Count the number of home page requests that load in under 100 ms, and then divide by the total number of home page requests.**Answer: D**
