Luckily, the 312-85 study materials from our company will help all people to have a good command of the newest information.

NEW QUESTION: 1 Sir Giles's irritating reserve, not even excused by a word of apology, reached the limits of his endurance. He respectfully protested. "I regret to find, sir," he said, "that I have lost my place in my employer's estimation. The man to whom you confide the superintendence of your clerks and the transaction of your business has, I venture to think, some claim (under the present circumstances) to be trusted." The banker was now offended on his side. "I readily admit your claim," he answered, "when you are sitting at your desk in my office. But, even in these days of strikes, co-operations, and bank holidays, an employer has one privilege left--he has not ceased to be a Man, and he has not forfeited a man's right to keep his own secrets. I fail to see anything in my conduct which has given you just reason to complain." Dennis, rebuked, made his bow in silence, and withdrew. Did these acts of humility mean that he submitted? They meant exactly the contrary. He had made up his mind that Sir Giles Mountjoy's motives should, sooner or later, cease to be mysteries to Sir Giles Mountjoy's clerk. In context, the word "rebuked" is best represented by **A.** courteously disagreed. **B.** sharply reprimanded. **C.** cautiously opposed. **D.** promptly challenged. **E.** genuinely dissuaded. **Answer: B**
Explanation: Explanation/Reference: To "rebuke" someone is to sharply reprimand them. Although the language used would not be considered particularly cutting today, the language and diction used place this excerpt some years back when conversation was more genteel, and the affront by Sir Giles to Dennis would have been scathing.

NEW QUESTION: 2 DRAG DROP You need to implement a Hyper-V Recovery Manager solution in the hosting environment of Northwind Traders. Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. **Answer:** Explanation: Topic 4, A. Datum Corporation Overview A). Datum Corporation is an accounting company. The company has a main office and two branch offices. The main office is located in Miami. The branch offices are located in New York and Seattle. Existing Environment Network Infrastructure The network contains an Active Directory domain named adatum.com. All servers run Windows Server 2008 R2. The main office has the following servers and client computers:---Two domain controllers configured as DNS servers and DHCP servers One file server that has multiple shares One thousand client computers that run Windows 7 Each branch office has the following servers and client computers:--One domain controller configured as a DNS server and a DHCP server Five hundred to 800 client computers that run Windows XP Each office has multiple subnets. The network speed of the local area network (LAN) is 1 gigabit per second. The offices connect to each other by using a WAN link. The main office is connected to the Internet. Current Issues The WAN link between the Miami office and the Seattle office is a low bandwidth link with high latency. The link will not be replaced for another year. Requirements Application Requirements The company is developing an application named App1. App1 is a multi-tier application that will be sold as a service to customers. Each instance of App1 is comprised of the following three

tiers:---A web front end A middle tier that uses Windows Communication Foundation (WCF) A Microsoft SQL Server 2008 R2 database on the back endEach tier will be hosted on one or more virtual machines. Multiple tiers cannot coexist on the same virtual machine.When customers purchase App1, they can select from one of the following service levels: Standard: Uses a single instance of each virtual machine required by App1. If a virtual machine becomes unresponsive, the virtual machine must be restarted. Enterprise: Uses multiple instances of each virtual machine required by App1 to provide high-availability and fault tolerance.All virtual hard disk (VHD) files for App1 will be stored in a file share. The VHDs must be available if a server fails.You plan to deploy an application named App2. App2 is comprised of the following two tiers:----A web front end A dedicated SQL Server 2008 R2 database on the back endApp2 will be hosted on a set of virtual machines in a Hyper-V cluster in the Miami office. The virtual machines will use dynamic IP addresses. A copy of the App2 virtual machines will be maintained in the Seattle office.App2 will be used by users from a partner company named Trey Research. Trey Research has a single Active Directory domain named treyresearch.com. Treyresearch.com contains a server that has the Active Directory Federation Services server role and all of the Active Directory Federation Services (AD FS) role services installed.Planned ChangesA). Datum plans to implement the following changes:-- ---- -Replace all of the servers with new servers that run Windows Server 2012.Implement a private cloud by using Microsoft System Center 2012 to host instances of App1.In the Miami office, deploy four new Hyper-V hosts to the perimeter network. In the Miami office, deploy two new Hyper-V hosts to the local network.In the Seattle office, deploy two new Hyper-V hosts.In the Miami office, implement a System Center 2012 Configuration Managerprimary site that has all of the system roles installed.Implement a public key infrastructure (PKI).Notification RequirementsA). Datum identifies the following notification requirements: Help desk tickets must be created and assigned automatically when an instance of App1 becomes unresponsive. Customers who select the Enterprise service level must receive an email notification each time a help desk ticket for their instance of App1 is opened or closed.Technical RequirementsA). Datum identifies the following technical requirements:--Minimize costs whenever possible.Minimize the amount of WAN trafficMinimize the amount of administrative effort whenever possible.Provide the fastest possible failover for the virtual machines hosting App2.Ensure that administrators can view a consolidated report about the softwareupdates in all of the offices.Ensure that administrators in the Miami office can approve updates for the clientcomputers in all of the offices.-----Security RequirementsA). Datum identifies the following security requirements:--- --An offline root certification authority (CA) must be configured.Client computers must be issued certificates by a server in their local office.Changes to the CA configuration settings and the CA security settings must be logged. Client computers must be able to renew certificates automatically over the Internet.The number of permissions and privileges assigned to users must be minimizedUsers from a group named Group1 must be able to create new instances of App1whenever possible. - in the private cloud. ---Client computers must be issued new certificates when the computers areconnected to the local network only.The virtual machines used to host App2 must use BitLocker Drive Encryption(BitLocker).Users from Trey Research must be able to access App2 by using their credentialsfrom treyresearch.com.

NEW QUESTION: 3Which of the following mechanisms are combined in a cloud balancing architecture?**A.** multi-device broker**B.** pay-for-use monitor**C.** automated scaling listener**D.** failover system**Answer: C,D**
