An Easy Access to your Estruturit Certification with 71201X Exam Questions, As I have mentioned already, the 71201X latest pdf vce the top-level unit.

NEW QUESTION: 1 Which IP SLA operation type is enhanced by the use of the IP SLAs Responder?
A. HTTP **B.** DNS **C.** ICMP Echo **D.** UDP Echo
Answer: D
Explanation: Figure 1. UDP Echo Operation
Response time (round-trip time) is computed by measuring the time taken between sending a UDP echo request message from Device B to the destination device--Device A--and receiving a UDP echo reply from Device A. UDP echo accuracy is enhanced by using the IP SLAs Responder at Device A, the destination Cisco device. If the destination device is a Cisco device, then IP SLAs sends a UDP datagram to any port number that you specified. Using the IP SLAs Responder is optional for a UDP echo operation when using Cisco devices. The IP SLAs Responder cannot be configured on non-Cisco devices.
