As indicator on your way to success, our **JN0-460 Braindump Free** practice materials can navigate you through all difficulties in your journey.

NEW QUESTION: 1 Use DOM programming to create XML according to the schema defined by NewsML (portions modified for this question). Push the Exhibit Button to load the referenced "XML Document".
`[XML Document]<NewsML><NewsItem><ContentItem>
<DataContent></DataContent></ContentItem></NewsItem></NewsML>` Load the "XML Document" and update the XML according to the method shown by "DOM Processing". Select which of the following correctly describes the results of performing a validation check on the created XML against the schema ("DTD" and "article.dtd"). Assume that "article.dtd" can be parsed normally during validation. The existence of a document type declaration during validation is not reflected.
[DOM Processing] Create XML using the following method.
Document output = createXML(doc);
The variable doc here references the Document instance of the loaded XML Document. Assume no execution errors.
A. The created XML does not follow element type declarations; therefore, is not valid against the schema
B. The created XML does not include required attributes; therefore, is not valid against the schema
C. The created XML has an illegal attribute value; therefore, is not valid against the schema
D. The created XML is valid against the schema
Answer: B
