The last one is the APP version of C_ACTIVATE22 dumps torrent questions, which can be used on all electronic devices, Estruturit provides an opportunity for fulfilling your career goals and significantly ease your way to become C_ACTIVATE22 Certified professional.

NEW QUESTION: 1 Sie entwickeln einen ASP.NET Core-Web-API-Webdienst, der mithilfe von Azure Application Insights die Leistung überwacht und Ereignisse nachverfolgt. Sie müssen die Protokollierung aktivieren und sicherstellen, dass Protokollnachrichten mit Ereignissen korreliert werden können, die von Application Insights verfolgt werden. Wie solltest du den Code vervollständigen? Ziehen Sie zum Beantworten die entsprechenden Code Segmente an die richtigen Positionen. Jedes Code Segment kann einmal, mehrmals oder gar nicht verwendet werden. Möglicherweise müssen Sie die Trennleiste zwischen den Fenstern ziehen oder einen Bildlauf durchführen, um den Inhalt anzuzeigen. **HINWEIS:** Jede richtige Auswahl ist einen Punkt wert. **Answer:** Explanation: Explanation: Box 1: ApplicationInsightsLoggerOptions If you want to include the EventId and EventName properties, then add the following to the ConfigureServices method: services.AddOptions<ApplicationInsightsLoggerOptions>().Configure(o => o.IncludeEventId = true); Box 2: IncludeEventID Box 3: ApplicationServices In Asp.Net core apps it turns out that trace logs do not show up in Application Insights out of the box. We need to add the following code snippet to our Configure method in Startup.cs: loggerFactory.AddApplicationInsights(app.ApplicationServices, logLevel); References: <https://blog.computedcloud.com/enabling-application-insights-trace-logging-in-asp-net-core/>

NEW QUESTION: 2 An ejb-jar also contains three interceptor classes: AInt, BInt, CInt. Each interceptor class defines an AroundInvoke method called intercept. The ejb-jar also contains a stateless session bean FooBean with a local business interface Foo that declares a method foo():10. @Stateless 11. @Interceptors ({CInt.class, BInt.class}) 12. public class FooBean implements Foo { 13. 14. public void foo () {} 15. 16. } The ejb-jar contains a META-INF/ejb-jar.xml file with an <interceptor-binding> section: <interceptor-binding><ejb-name>FooBean</ejb-name><interceptor-order><interceptor.class>com.acme.AInt</interceptor-class></interceptor-order></interceptor.binding> What is the interceptor order when the business method foo() is invoked? **A.** AInt, CInt, BInt **B.** CInt, BInt, AInt **C.** AInt **D.** AInt, BInt, CInt **Answer: A** Explanation: With

the interceptor-order clauses Aint will be first in the order of interceptors. Within each group (default, class, method) the order of the interceptors are from left to right as defined in the @Interceptors annotation, and then the xml interceptors. In this scenario, with the @Interceptors ({CInt.class, BInt.class}) line, the ordering continues with CInt and BInt. Note 1: By default the ordering of interceptors when invoking a method are *External interceptors ** Default interceptors, if present ** Class interceptors, if present ** Method interceptors, if present * Bean class interceptor method Note 2: You can override the default sort order of the external interceptors by specifying an interceptor-binding with an interceptor-order specifying the order of the interceptors Reference: EJB Interceptors <http://docs.jboss.org/ejb3/app-server/tutorial/interceptor/interceptor.html>

NEW QUESTION: 3 A DLP rule with an action of Exempt has been matched against traffic passing through the FortiGate unit. Which of the following statements is correct regarding how this transaction will be handled by the FortiGate unit? **A.** The traffic matching the DLP rule will bypass antivirus scanning. **B.** The client IP address will be added to a white list. **C.** Any other matched DLP rules will be ignored with the exception of Archiving. **D.** Future files whose characteristics match this file will bypass DLP scanning. **Answer: C**

NEW QUESTION: 4 What is the purpose of Priority Delta in VRRP? **A.** When a box fail, Effective Priority = Priority - Priority Delta **B.** When a box is up, Effective Priority = Priority + Priority Delta **C.** When an Interface fail, Effective Priority = Priority - Priority Delta **D.** When an Interface is up, Effective Priority = Priority + Priority Delta **Answer: C** Explanation: Explanation Each instance of VRRP running on a supported interface may monitor the link state of other interfaces. The monitored interfaces do not have to be running VRRP. If a monitored interface loses its link state, then VRRP will decrement its priority over a VRID by the specified delta value and then will send out a new VRRP HELLO packet. If the new effective priority is less than the priority a backup platform has, then the backup platform will begin to send out its own HELLO packet. Once the master sees this packet with a priority greater than its own, then it releases the VIP. References:
