NEW QUESTION: 2 Which of the following is not true about international transfer prices for a multinational firm? **A.** Allows firms to attempt to minimize worldwide taxes. **B.** Allows firms to correctly price products in each country in which it operates. **C.** Provides each division with a profit-making orientation. **D.** Allows the firm to evaluate each division. **Answer: B** Explanation: The calculation of transfer prices in the international arena must be systematic. A scheme for calculating transfer prices for a firm may correctly price the firm's product in Country A but not in Country B. The product may be overpriced in Country B, causing sales to be lower than

anticipated. Alternatively, the product may be underpriced in Country B, and the authorities may allege that the firm is dumping its product there.
