NEW QUESTION: 1 DRAG DROP You are developing a SQL Server Reporting Services (SSRS) report to display a list of employees. The report will be embedded into a Microsoft SharePoint Server Web Part Page of the company intranet site. The report consists of a single table. The design of the table is shown in the following diagram. You need to configure the EmailAddress detail text box to create a new email message. The email message must be addressed to the email address that was clicked by the user. Which four actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)
Answer: Explanation:

NEW QUESTION: 2 The Marketing Director at Cloud Kicks has requested that a form be added to the company website to capture new lead contact information and the Primary Product they are interested in. Once submitted, a lead should receive an email tailored to the Primary Product they selected. The lead record should also be assigned to the correct owner for that Primary Product. Which three steps are required to create an efficient solution? Choose 3 answers.
A. Leverage a Lightning Component that collects the information and routes it.
B. Create email templates for each Primary Product with corresponding email response rules.
C. Configure lead assignment rules to route leads to the correct owner.
D. Generate a web-to-lead form that includes both standard and custom fields.
E. Create a Visualforce page that includes both standard and custom fields.
F. Create a lead owner field on the product record to use for assignment.
Answer: B,C,D
