NEW QUESTION: 1 In a client/server configuration, security encryption keys are imported to the computer where each of the Datacap components is installed and configured. In which of the following Datacap components would the encryption key be created?
A. Datacap Desktop
B. Datacap Application Manager
C. Datacap Server
D. Datacap Rulerunner
Answer: C
Explanation/Reference: Explanation: In a client/server configuration, you must generate and export matching security encryption keys from the server on which the Datacap server software component is installed to all of the computers on which any Datacap component is installed. This requirement secures any passwords that are passed over or received from the network by the Datacap component.
