You just need to make use of your spare time to finish learning our 1z1-808 study materials.

**NEW QUESTION: 1** Drag the interpersonal skill on the left to the correct scenario on the right.  
**Answer:** Explanation:

**NEW QUESTION: 2** In which of the following situations would it be BEST to use a detective control type for mitigation?  
**A.** A company purchased liability insurance for flood protection on all capital assets  
**B.** A company implemented a network load balancer to ensure 99.999% availability of its web application  
**C.** A company designed a backup solution to increase the chances of restoring services in case of a natural disaster  
**D.** A company purchased an IPS system, but after reviewing the requirements, the appliance was supposed to monitor not block, any traffic  
**E.** A company purchased an application-level firewall to isolate traffic between the accounting department and the information technology department  
**Answer: B**

**NEW QUESTION: 3** DRAG DROP  
Your company has an Office 365 subscription and uses Microsoft Exchange Online. Some employees have archive mailboxes that have the default retention policy applied. The default retention policy does not meet the latest company requirements. You create a retention policy named RetentionPolicy1 and apply the necessary retention tags to the policy. You need to apply the new retention policy to all archive mailboxes and ensure that the new retention policy tags are applied as soon as possible. Which three Windows PowerShell commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.  
**Answer:** Explanation:  
Box 1: Retention Policy Tags are used to apply retention settings to folders and individual items such as e-mail messages. These settings specify how long a message remains in a mailbox and the action to be taken when the message reaches the specified retention age. A Retention Policy is a group of retention tags that can be applied to a mailbox.  
Box 2: The Get-Mailbox cmdlet retrieves a list of mailboxes. The -Filter {(ArchiveStatus -eq 'Active')} statement filters the list of retrieved mailboxes to list only the mailboxes that have Archiving enabled and active.  
Box 3: The Set-Mailbox cmdlet is used to assign the retention policy to the mailboxes retrieved in step 1.  
Box 4: The Start-ManagedFolderAssistant cmdlet is used to immediately start messaging records management (MRM) processing of mailboxes. This will immediately apply the new retention policy.
