These 312-39 exam questions Estruturit are designed in a way that makes Estruturit very simple for the candidates, 312-39 quiz torrent is responsible to all [Exam CCP Preparation](#) candidates and always tries its best to send all advantages to its customers.

NEW QUESTION: 1次の図に示すように、Queue1という名前のAzure Service Busキューを作成します。

M1という名前のメッセージがQueue1から配信不能キューに移動されましたか？**A.** until a client app executes the complete () method on M1**B.** クライアントapがM1を読み取るまで**C.** 20日**D.** 365日**Answer: C**

NEW QUESTION: 2You are working for a company and been allocated the task for ensuring that there is a federated authentication mechanism setup between AWS and their On-premise Active Directory. Which of the following are important steps that need to be covered in this process? Choose 2 answers from the options given below. Please select:**A.** Configure AWS as the relying party in Active Directory**B.** Ensure the right match is in place for On-premise AD Groups and 1AM Groups.**C.** Configure AWS as the relying party in Active Directory Federation services**D.** Ensure the right match is in place for On-premise AD Groups and 1AM Roles.**Answer: C,D**

Explanation:ExplanationThe AWS Documentation mentions some key aspects with regards to the configuration of On-premise AD with AWS One is the Groups configuration in AD Active Directory Configuration Determining how you will create and delineate your AD groups and 1AM roles in AWS is crucial to how you secure access to your account and manage resources. SAML assertions to the AWS environment and the respective 1AM role access will be managed through regular expression (regex) matching between your on-premises AD group name to an AWS 1AM role. One approach for creating the AD groups that uniquely identify the AWS 1AM role mapping is by selecting a common group naming convention. For example, your AD groups would start with an identifier, for example, AWS-, as this will distinguish your AWS groups from others within the organization. Next include the 12-digit AWS account number. Finally, add the matching role name within the AWS account. Here is an example: And next is the configuration of the relying party which is AWSADFS federation occurs with the participation of two parties; the identity or claims provider (in this case the owner of the identity repository - Active Directory) and the relying party, which is another application that wishes to outsource authentication to the identity provider; in this case Amazon Secure Token Service (STS). The relying party is a federation partner that is represented by a claims provider trust in the federation service. Option B is invalid because AD groups should not be matched to 1AM Groups Option C is invalid because the relying party should be configured in Active Directory Federation services For more information on the federated access, please visit the following URL:1

<https://aws.amazon.com/blogs/security/aws-federated-authentication-with-active-directory-federation-services-ad> The correct answers are: Ensure the right match is in place for On-premise AD Groups and 1AM Roles., Configure AWS as the relying party in Active Directory Federation services Submit your Feedback/Queries to our Experts
