**NEW QUESTION: 3**Note: This question is part of a series of questions that use the same set of answer choices. An answer choice may be correct for more than one question in the series. Your network contains a System Center 2012 Configuration Manager environment as shown in the exhibit. (Click the Exhibit button.) The network contains six servers. The servers are configured as shown in the following table. You need to ensure that mobile device information is available in the hardware inventory. What should you do first? Exhibit: **A.** Install a protected distribution point on Server1. **B.** Install a management point on Server5. **C.** Install the Windows Cluster

service on Server6.**D.** Configure IIS to support only HTTP on Server3.**E.** Install an enrollment proxy point on Server6.**F.** Install Network Load Balancing (NLB) on Server6.**G.** Install a PXE-enabled protected distribution point on Server5.**H.** Install a software update point on Server3.**I.** Configure the Exchange connector on Server3.**J.** Install a management point on Server2.**K.** Install a PXE-enabled protected distribution point on Server4.**L.** Configure IIS to support only HTTPS on Server5.**M.** Install Network Load Balancing (NLB) on Server3.**N.** Install Windows Server Update Services (WSUS) on Server3.**O.** Install the Windows Cluster service on Server3.**Answer: I**  
**Explanation:** Sorry this question series is one the most annoying ones, i have ever had in an exam. Just my feelings, that the correct answers aren't the answers Microsoft want to hear. For this one there shouldn't be any doubt, that the SCCM Server (Server 3) needs the Exchange connector. Why? Because the mobile devices aren't specified. To include all Active Sync Devices (Android, Symbian...) you need Exchange. Install an enrollment proxy point on Server6 could be a correct answer, too.

**NEW QUESTION: 4** The IBM Security Access Manager V9.0 deployment professional has recently discovered an entire deployment of over 100 junctions was performed incorrectly.
