Answer: A

NEW QUESTION: 4 Quota sampling was developed in the late 1930s and used extensively by the Gallup organization. Babbie (1979) describes the steps involved in developing a quota sample. All of the following are out of those steps EXCEPT:
A. When all the sample elements are so weighted, the overall data should provide a reasonable representation of the majority of the samples
B. Develop a matrix describing the characteristics of the target population. This may entail knowing the proportion of male and female; various age, racial and ethnic proportions; as well as the education and income levels of the population
C. All persons in a given cell are then assigned a weight appropriate to their proportion of the total
D. Once the matrix has been created and a relative proportion assigned to each cell in the matrix, data are collected from persons having all the characteristics of a given cell
Answer: A
