The free demo is short and incomplete, if you want to get the complete [HCIE-openGauss \(Written\) V1.0](#) cram sheet you must pay and purchase, We set up good relationship with this corporation's staff and have the best information resources.

**NEW QUESTION: 1**CORRECT TEXT Can anyone add a team member to an account team?

**Answer:** Explanation: No. You need to either be the owner sharing the record or have read permission on the account.

**NEW QUESTION: 2** Which of the following can only be mitigated through the use of technical controls rather than user security training? **A.** Phishing **B.** Shoulder surfing **C.** Zero-day **D.** Trojans

**Answer: C** Explanation: A zero day vulnerability is an unknown vulnerability in a software application. This cannot be prevented by user security training. A zero day vulnerability refers to a hole in software that is unknown to the vendor. This security hole is then exploited by hackers before the vendor becomes aware and hurries to fix it - this exploit is called a zero day attack. Uses of zero day attacks can include infiltrating malware, spyware or allowing unwanted access to user information. The term "zero day" refers to the unknown nature of the hole to those outside of the hackers, specifically, the developers. Once the vulnerability becomes known, a race begins for the developer, who must protect users.

**NEW QUESTION: 3** PPP is more secure than HDLC because PPP supports authentication protocols such as ( ). (Choose two) **A.** MD5 **B.** SSH **C.** CHAP **D.** PAP **Answer: C, D**
