Trailを作成します。ログデータをレポートに集約するスクリプトを構成し、それを週に1回S3に発行して、これをCTOに配信します。 **Answer: D** Explanation: This is the ideal use case for AWS CloudTrail. CloudTrail provides visibility into user activity by recording API calls made on your account. CloudTrail records important information about each API call, including the name of the API, the identity of the caller, the time of the API call, the request parameters, and the response elements returned by the AWS service. This information helps you to track changes made to your AWS resources and to troubleshoot operational issues. CloudTrail makes it easier to ensure compliance with internal policies and regulatory standards. Reference:
