You may have gone through a lot of exams, You must consider using all of our products including detailed Avaya Aura® Communication Applications Support Certified Exam questions answers, No help, full refund!, You can also live a better life if you study on our 72301X test cram material.

The activation key entered in the Activate keys dialog box is invalid or typed incorrectly, We hope you will have a great experience with 72301X preparation materials.

If you choose to use our 72301X test quiz, you will find it is very easy for you to pass your 72301X exam in a short time, What you have bought will totally have no problem.

**NEW QUESTION: 1** Out of several risk responses, which of the following risk responses is used for negative risk events? **A.** Share **B.** Accept **C.** Enhance **D.** Explanation: Among the given choices only Acceptance response is used for negative risk events. Risk acceptance means that no action is taken relative to a particular risk; loss is accepted if it occurs. If an enterprise adopts a risk acceptance, it should carefully consider who can accept the risk. Risk should be accepted only by senior management in relationship with senior management and the board. There are two alternatives to the acceptance strategy, passive and active. Passive acceptance means that enterprise has made no plan to avoid or mitigate the risk but willing to accept the consequences of the risk. Active acceptance is the second strategy and might include developing contingency plans and reserves to deal with risks. **E.** Exploit **Answer: B, D**  
Explanation: A, and B are incorrect. These all are used to deal with opportunities or positive risks, and not with negative risks.

**NEW QUESTION: 2** Which three common tasks must be performed in enterprise security risk assessment? (Choose three.) **A.** Evaluate physical protection applied to computing equipment and other network components **B.** Analyze assets, threats, and vulnerabilities, including their impacts and likelihood. **C.** Restrict access rights for applications, systems, processes, and devices to only those permissions needed to perform authorized activities. **D.** Remove the ability to access lab equipment remotely **E.** Change all user passwords older than 6 months **F.** Review current level of security awareness and commitment of staff within the organization **Answer: B, C, F**

**NEW QUESTION: 3** When a client who is 25 years of age asks the nurse when she should seek fertility counseling, the best response by the nurse is: **A.** "We can give you some guidance now on how to increase your chances of conceiving and then refer you if it doesn't happen within a year." **B.** "Fertility counseling should be sought when you have not been able to conceive after 6-9 months of unprotected intercourse." **C.** "The average time it takes someone your age to conceive is 51  $\times$  2 months, so if you haven't conceived by then, we can refer you." **D.** "Fertility counseling should be sought when you have been unable to conceive after 1 year of unprotected intercourse." **Answer: A**  
Explanation: Explanation/Reference: Explanation: The guidelines for a fertility workup are to refer after the couple has not conceived after one year of unprotected intercourse. So, Choice 1 is technically correct, but it doesn't consider the immediate need for the couple to have some counseling. Choice 4 is the best answer because it gives the couple guidance now and the referral at the appropriate time. If the woman is over the age of 35, an earlier referral, at six to nine months of unprotected intercourse, is appropriate. It is true that the average time it takes a 25-year-old woman to conceive is 5.3 months, but that does not address the concern the client is expressing. Choice 4 is still the most

caring and correct answer. Couples conceive within the first month of unprotected intercourse 20% of the time. Health Promotion and Maintenance
