Maybe you just need Terraform-Associate-003 dumps collection to realize your dream of promotion, There is a useful and reliable Terraform-Associate-003 study material for you, Here, we will help you out of the miserable situation.

NEW QUESTION: 1Your network contains an Active Directory forest named contoso.com. The password policy of the forest requires that the passwords for all of the user accounts be changed every 30 days. You need to create user accounts that will be used by services. The passwords for these accounts must be changed automatically every 30 days. Which tool should you use to create these accounts? To answer, select the appropriate tool in the answer area.
Point and Shoot:**Answer:** Explanation: Explanation: Use the New-ADServiceAccount cmdlet in PowerShell to create the new accounts as managed service accounts. Managed service accounts offer Automatic password management, making password management easier.
Reference 1: <http://technet.microsoft.com/en-us/library/dd367859.aspx> What are the benefits of new service accounts? In addition to the enhanced security that is provided by having individual accounts for critical services, there are four important administrative benefits associated with managed service accounts:-(...)-Unlike with regular domain accounts in which administrators must reset passwords manually, the network passwords for these accounts will be reset automatically.-(...) Reference 2:
<http://technet.microsoft.com/en-us/library/dd391964.aspx> Use the Active Directory module for Windows PowerShell to create a managed service account. Reference 3:
<http://technet.microsoft.com/en-us/library/dd548356.aspx> To create a new managed service account
1. On the domain controller, click Start, and then click Run. In the Open box, type dsa.msc, and then click OK to open the Active Directory Users and Computers snap-in. Confirm that the Managed Service Account container exists.
2. Click Start, click All Programs, click Windows PowerShell 2.0, and then click the Windows PowerShell icon.
3. Run the following command: New-ADServiceAccount [-SAMAccountName <String>] [-Path <String>]. Reference 4:
<http://technet.microsoft.com/en-us/library/hh852236.aspx> Use the -ManagedPasswordIntervalInDays parameter with New-ADServiceAccount to specify the number of days for the password change interval. -ManagedPasswordIntervalInDays<Int32> Specifies the number of days for the password change interval. If set to 0 then the default is used. This can only be set on object creation. After that the setting is read only. This value returns the msDS-ManagedPasswordInterval of the group managed service account object. The following example shows how to specify a 90 day password changes interval:
-ManagedPasswordIntervalInDays 90
