NEW QUESTION: 1DRAG DROPYou are developing a SQL Server Integration Services (SSIS) package to insert new data into a data mart. The package uses a Lookup transformation to find matches between the source and destination. The data flow has the following requirements: New rows must be inserted. Lookup failures must be written to a flat file. In the Lookup transformation, the setting for rows with no matching entries is set to Redirect rows to no match output. You need to configure the package to direct data into the correct destinations. How should you design the data flow outputs? (To answer, drag the appropriate transformation from the list of answer options to the correct location in the answer area.)

Answer: Explanation:

NEW QUESTION: 2A company has custom ASP.net and Java applications that run on old versions of Windows and Linux. The company plans to place applications in containers. You need to design a solution that includes networking, service discovery, and load balancing for the applications. The solution must support storage orchestration. Solution: You create an Azure virtual network, a public IP address, and load balancer. Then add virtual machines (VMs) to the solution and deploy individual containers on them. Does the solution meet the goal?**A. No****B. Yes****Answer: A**

NEW QUESTION: 3In reviewing a colleague's code, you note the following code in the dialog flow which takes user input and replaces the words "authorized user" or "auth user" with "AU" before then calling the intent resolution in the dialog flow with the altered string. `"${utterance.value?replace('authorized user|auth user' , 'AU','r')}`" Why would your colleague have done this?**A.** The language tag is being changed to Australian (AU) to better match the language of the training utterances.**B.** By replacing "Authorized" and "auth", one is able to bypass the usual authentication mechanism, which requires a user to log on.**C.** "Authorized" and "auth" are reserved words and would fail intent resolution.**D.** The above code has no impact on intent resolution.**E.** The sentence is being normalized by replacing different versions

of words such that they are aligned with the term used in the training utterances.**Answer: D**

NEW QUESTION: 4Which of the following is False for iBase SQL server?**A.** iBase requires case-sensitive SQL Servers**B.** The default SQL Server collation sequence for the operating system must be used**C.** The SQL Server language version must match the operating system regional setting if it is available.**D.** The SQL Server language version must be English if the operating system regional setting is not available**Answer: A**
