Do not miss the easy way to your success future.

NEW QUESTION: 1A. Option AB. Option DC. Option BD. Option CAnswer: D

NEW QUESTION: 2You are developing an application that uses ASP.NET Core Identity for authorization. The application must use an existing Microsoft Azure Table Storage instance to store user information. You create a custom UserStore class.You need to register the class as a dependency.Which two interfaces should you implement? Each correct answer presents part of the solution.NOTE: Each correct selection is worth one point.**A. IUserStoreB. IQueryableUserStoreC. IUserSecurityStampStoreD. IUserPasswordStoreE. IUserLoginStore**

Answer: A, EExplanation:Explanation/Reference:Explanation:D: Create a UserStore class that provides the methods for all data operations on the user. This class is equivalent to the UserStore class. In your UserStore class, implement IUserStore<TUser> and the optional interfaces required. You select which optional interfaces to implement based on the functionality provided in your app.Interfaces to implement when customizing user store
IUserStoreThe IUserStore<TUser> interface is the only interface you must implement in the user store. It defines methods for creating, updating, deleting, and retrieving users.IUserLoginStore
The IUserLoginStore<TUser, TKey> defines the methods you must implement in your user store to enable external authentication providers. It contains methods for adding, removing and retrieving user logins, and a method for retrieving a user based on the login information.
