If you failed the exam, we will full refund you, So why don't you choose our CTPRP study guide and CTPRP exam torrent as a comfortable passing plan, As long as you need help, we will offer instant support to deal with any of your problems about our CTPRP exam questions.

Meanwhile your reviewing process would be accelerated, Please trust us, The manufacture of our CTPRP study materials is completely according with strict standard.

NEW QUESTION: 1 To do a password recovery on a Cisco NX-OS Switch, which option shows the correct syntax to display the bootflash contents at the switch (boot)#? **A.** dir bootflash: **B.** show bootflash: **C.** display bootflash: **D.** find bootflash **Answer: A**

NEW QUESTION: 2 HOTSPOT **Answer:** Explanation:

NEW QUESTION: 3 **A.** varchar(11) **B.** nvarchar(11) **C.** char(11) **D.** bigint **Answer: C** **Explanation:**
Topic 5, Litware, Inc Overview General Overview You are a database developer for a company named Litware, Inc. Litware has a main office in Miami. Litware has a job posting web application named WebApp1. WebApp1 uses a database named DB1. DB1 is hosted on a server named Server1. The database design of DB1 is shown in the exhibit. (Click the Exhibit button.) WebApp1 allows a user to log on as a job poster or a job seeker. Candidates can search for job openings based on keywords, apply to an opening, view their application, and load their resume in Microsoft Word format. Companies can add a job opening, view the list of candidates who applied to an opening, and mark an application as denied. Users and Roles DB1 has five database users named Company, CompanyWeb, Candidate, CandidateWeb, and Administrator. DB1 has three user-defined database roles. The roles are configured as shown in the following table. Keyword Search The keyword searches for the job openings are performed by using the following stored procedure named usp_GetOpenings: Opening Update Updates to the Openings table are performed by using the following stored procedure named usp_UpdateOpening: Problems and Reported Issues Concurrency Problems You discover that deadlocks frequently occur. You identify that a stored procedure named usp_AcceptCandidate and a stored procedure named usp_UpdateCandidate generate deadlocks. The following is the code for usp_AcceptCandidate: Salary Query Issues Users report that when they perform a search for job openings without specifying a minimum salary, only job openings that specify a minimum salary are displayed. Log File Growth Issues The current log file for DB1 grows constantly. The log file fails to shrink even when the daily SQL Server Agent Shrink Database task runs. Performance Issues You discover that a stored procedure named usp_ExportOpenings takes a long time to run and executes a table scan when it runs. You also discover that the usp_GetOpenings stored procedure takes a long time to run and that the non-clustered index on the Description column is not being used. Page Split Issues On DB1, many page splits per second spike every few minutes. Requirements Security and Application Requirements Litware

identifies the following security and application requirements: - Only the Administrator, Company, and CompanyWeb database users must be able to execute the usp_UpdateOpening stored procedure. - Changes made to the database must not affect WebApp1.Locking RequirementsLitware identifies the following locking requirements: - The usp_GetOpenings stored procedure must not be blocked by the usp_UpdateOpening stored procedure. - If a row is locked in the Openings table, usp_GetOpenings must retrieve the latest version of the row, even if the row was not committed yet. Integration RequirementsLitware exports its job openings to an external company as XML data. The XML data uses the following format: A stored procedure named usp_ExportOpenings will be used to generate the XML data. The following is the code for usp_ExportOpenings: The stored procedure will be executed by a SQL Server Integration Services (SSIS) package named Package1. The XML data will be written to a secured folder named Folder1. Only a dedicated Active Directory account named Account1 is assigned the permissions to read from or write to Folder1. Refactoring RequirementsLitware identifies the following refactoring requirements: - New code must be written by reusing the following query: - The results from the query must be able to be joined to other queries. Upload RequirementsLitware requires users to upload their job experience in a Word file by using WebApp1. WebApp1 will send the Word file to DB1 as a stream of bytes. DB1 will then convert the Word file to text before the contents of the Word file is saved to the Candidates table. A database developer creates an assembly named Conversions that contains the following: - A class named Convert in the SqlConversions namespace - A method named ConvertToText in the Convert class that converts Word files to text. The ConvertToText method accepts a stream of bytes and returns text. The method is used in the following stored procedure: Job Application Requirements A candidate can only apply to each job opening once. Data Recovery Requirements All changes to the database are performed by using stored procedures. WebApp1 generates a unique transaction ID for every stored procedure call that the application makes to the database. If a server fails, you must be able to restore data to a specified transaction.

NEW QUESTION: 4 Was müssen Sie in SAP EWM Extended Warehouse Management konfigurieren, um die Entkonsolidierungsverarbeitung zu ermöglichen? Bitte wählen Sie die richtige Antwort. **A.** Arbeitsplatz **B.** Verpackungsspezifikation **C.** Strategie weglegen **D.** Regeln für die Erstellung von Lageraufträgen **Answer: B**
