NEW QUESTION: 2 Object Security controls access to Subject Areas, Tables, and Columns in OBIEE and can be implemented by using which method?
A. LDAP Authentication
B. Business Logic Object Security
C. Single Sign-On (SSO)
D. External Table Authentication
E. Database Authentication
Answer: B
Explanation: Explanation/Reference: Object-level security controls the visibility to business logical objects based on a user's role. You can set up object-level security for metadata repository objects, such as subject areas and presentation folders, and for Web objects, such as dashboards and dashboard pages, which are defined in the Presentation

Catalog.1) Business logic objectThis controls access to objects, such as:* subject areas* presentation tables* presentation columnsFor example, users in a particular department can view only the subject areas that belong to their department.2) Web object securityThis provides security for objects stored in the Web Catalog, such as dashboards, dashboard pages, folders, and reports. You can view only the objects for which you are authorized. For example, a mid-level manager may not be granted access to a dashboard containing summary information for an entire department.
