Explanation: Explanation
event suppression Specified events notifications can be suppressed on the basis of source/destination IP address or per Rule. Note: When you add event suppression for a rule. The signature inspection works as normally but the system does not generate the events if traffic matches the signature. If you specify a specific Source/Destination then events do not appear only for the specific source/destination for this rule. If you choose to suppress the complete rule then the system does not generate any event for this rule.
Steps to configure Event Threshold:

Step 2.

Click Event Filtering.Step 3. Click Suppression.Step 4.Select Suppression Type from the drop down list. (Ruleor Source or Destination).Step 5. Click OK to complete.
