We have clear data collected from customers who chose our ANS-C01 training engine, the passing rate is 98-100 percent, Hurry up to visit Estruturit to purchase ANS-C01 exam materials.

NEW QUESTION: 1---You have a System Center 2012 R2 infrastructure that has Orchestrator and Service Manager installed. Integration between Orchestrator and Service Manager is configured. You need to ensure that when a change request is made in Service Manager, the following requirements are met: The ticket number is logged to a file. The file contains the ticket numbers for every change request. Each time a ticket number is logged to the file, an email message is sent to an administrator. Which activities should you use in a runbook? **A.** Get Activity, Append Line, and Send Email **B.** Monitor Object, Append Line, and Send Email **C.** Monitor State, Insert Line, and Send Email **D.** Monitor Object, Insert Line, and Send Email
Answer: B Explanation: <http://technet.microsoft.com/en-us/library/hh549275.aspx> You do not know when the action should take place. So you need the monitor to trigger your action (not the other way around). The get activity is used when a runbook is already running. <http://technet.microsoft.com/en-us/library/hh206072.aspx> Above states to use the Append Line command for logging purposes (which is not described as such for the Insert Line command). "Use the Append Line activity to append lines to a log file to create audits trails of runbooks."
Topic 9, Contoso, Ltd (B) Overview Contoso, Ltd. is a manufacturing company. Contoso has a main office and six branch offices. The main office is located in Toronto. The branch offices are located in New York, Seattle, Miami, Montreal, Los Angeles, and Vancouver. Existing Environment Active Directory Environment The network contains an Active Directory forest named contoso.com. The forest contains a child domain for each office. Active Directory currently contains 7,500 user accounts and 15,000 computer accounts. Network Infrastructure All servers are located in a data center in Toronto. The data center contains multiple subnets that are separated by firewalls. The Toronto data center contains a cluster that runs Microsoft SQL Server 2008 Enterprise Service Pack 1 (SP1). Four servers are unused and are being considered as potential Hyper-V hosts. The servers are configured as shown in the following table. All of the servers being considered as potential Hyper-V hosts have both locally attached storage and access to a SAN. Help Desk Environment Contoso uses a help desk ticketing system that was developed in-house. Fifty help desk agents have access to the ticketing system. The

ticketing system currently tracks:--An average of two new incidents per month, per client computer An average of 2,000 change requests per monthDisaster Recovery Environment Contoso uses a third-party backup solution. Backups are scheduled for the servers in the Seattle office as follows:---The daily incremental backups total 10 GB. The total size of data to back up is 100 GB. Backed up data is retained for 10 business days.Problem StatementsThe original developers of the help desk ticketing system are no longer employed by Contoso and maintenance of the system is becoming an issue.RequirementsPlanned ChangesContoso plans to move the IT infrastructure to a private cloud.Whenever possible, hardware and software costs must be minimized.Contoso plans to open a small office in Beijing. System Center 2012 App Controller will be used to manage applications. The display names of the applications will be in Simplified Chinese Pinyin IME.New physical servers will be deployed by using System Center 2012 Configuration Manager from a server named Server5. Server5 will also be a PXE service point.The current backup solution will be replaced with System Center 2012 Data Protection Manager (DPM).A public key infrastructure (PKI) will be deployed to issue and manage certificates. The PKI deployment must be made as secure as possible.Hardware load balancers will be deployed for use in the deployment of private cloud services.Cloud RequirementsContoso plans to implement a cloud solution that meets the following requirements:-----Stores all virtual machines on the SAN only.Uses SAN copy to provision the virtual machines.Provides the ability to manage the resolution of incidents.Contains managed virtual machines across both private and public clouds.Provides the ability to customize the settings of management packs provided by Microsoft. - Collects security events from all of the servers running in the private cloud and provides centralized reporting on the events.App1 RequirementsA new application named App1 will be deployed to the private cloud. App1 is a three-tier application that contains the following components: - A front-end tier that runs a web server. The tier must be highly available and capable of being quickly scaled out if required.- A middle tier that runs an application server.- A back-end tier that runs a database.App2 RequirementsAn application named App2 will be deployed to the public cloud. Users will be authenticated by using the on-premises Active Directory. The users must be able to access App2 without being prompted for authentication again.

NEW QUESTION: 2 질문에 답하려면 아래 정보를 참조하십시오. 보안 전문가는 조직의 네트워크에 대한 클라이언트 기반 공격을 탐지합니다. 이러한 문제를 해결하려면 계획이 필요합니다. 조직이 클라이언트 기반 공격을 완화하기 위한 계획을 추구해야 하는 가장 좋은 이유는 무엇입니까?**A.** 클라이언트 기반 공격은 서버 및 네트워크 기반 공격보다 더 일반적이고 악용하기 쉽습니다.**B.** 클라이언트 기반 공격은 재정적 영향이 더 큼니다.**C.** 클라이언트 강화 및 관리는 서버보다 클라이언트에서 더 쉽습니다.**D.** 클라이언트 권한 관리는 본질적으로 서버 권한 관리보다 약합니다.**Answer: A**

NEW QUESTION: 3 Which of the following Common Data Network Services is used to share data files and subdirectories on file servers?**A.** File services.**B.** Print services.**C.** Client/Server services.**D.** Mail services.**Answer: A** Explanation: File services share data files and subdirectories on file servers. Source: KRUTZ, Ronald L. & VINES, Russel D., The CISSP Prep Guide: Mastering the Ten Domains of Computer Security, 2001, John Wiley & Sons, Page 99.
