NEW QUESTION: 3You have an Azure virtual machine named VM1.The network interface for VM1 is configured as shown in the exhibit. (Click the Exhibit tab.) You deploy a web server on VM1, and then create a secure website that is accessible by using the HTTPS protocol. VM1 is used as a web server only.You need to ensure that users can connect to the website from the internet.What should you do?**A.** For Rule5, change the Action to Allow and change the priority to 401.**B.** Create a new inbound rule that allows TCP protocol 443 and configure the protocol to have a priority of501.**C.** Modify the protocol of Rule4.**D.** Delete Rule1.**Answer: A**Explanation: ExplanationRule 2 is blocking HTTPS access (port 443) and has a priority of 500.Changing Rule 5 (ports 50-5000) and giving it a lower priority number will allow access on port 443.Note: Rules are processed in priority order, with lower numbers processed before higher numbers, because lower numbers have higher priority. Once traffic matches a rule, processing stops.References: <https://docs.microsoft.com/en-us/azure/virtual-network/security-overview>

NEW QUESTION: 4Your company is currently on the verge of bankruptcy due to the lack of transparency within the organization; this alerted the CEO to take decisive actions and request that new reporting lines be established in order to be fully transparent. The new reporting lines triggered changes in roles & responsibilities for managing communication and communication policies & constraints. Where are these changes reflected when it relates to your portfolio?**A.** Portfolio Process Assets updates**B.** Organizational Process Assets updates**C.** Portfolio Management Plan updates**D.** Portfolio Updates**Answer: C**
