NEW QUESTION: 2DRAG DROP You need to identify which tasks must be performed to configure pool pairing between the Front End pools. Which four actions should you identify? To answer, move the four appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation:Explanation:Box 1:Box 2:Box 3:Box 4: Note:*For Lync Server 2013, any time you add or remove a Front End Server from the pool, you must restart services. Removing and adding servers should be done as separate operations. For example, if you are going to add two Front End Servers, and remove two Front End Servers, use the following process:*On the Define the SQL store page, do one of the following:To use an existing SQL Server store that has already been defined in your topology, select an instance from SQL store.To define a new SQL Server instance to store pool information, click New and then specify the SQL Server FQDN in the Define New SQL Store dialog box.To specify the name of a SQL Server instance, select Named Instance, and then specify the name of the instance.To use the default instance, click Default instance.To use SQL Mirroring, select Enable SQL mirroring and select an existing instance or create a new instance.*Invoke-CsBackupServiceSyncManually invokes backup synchronization between a Microsoft Lync Server 2013 pool and its designated backup pool. This allows administrators to synchronize data without waiting for Lync Server

replication. The Invoke-CsBackupServiceSync cmdlet enables administrators to synchronize the data between a Registrar pool and its backup pool. Invoke-CsBackupServiceSync will only copy as much data as needed in order to bring the two pools into sync. *Incorrect: Export-CsConfigurationExports your Lync Server topology, policies, and configuration settings to a file. Among other things, this file can then be used to restore this information to the Central Management store after an upgrade, a hardware failure, or some other issue has resulted in data loss. This cmdlet was introduced in Lync Server 2010. Reference: Define and Configure a Front End Pool or Standard Edition Server Section 4: Sec Four (32 to 75) Details: Topic 4, Mix Questions
