NEW QUESTION: 1Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Your company has a Microsoft Exchange Server 2019 server named EX01. EX01 has the default Receive connectors. EX01 receives Internet email on port 25 from an appliance in the company's perimeter network. The company has an application named App1 that can only send email on port 25. The application administrator requests that you enable App1 to route email through EX01 for delivery.You need to ensure that EX01 only accepts email from the appliance and App1. Solution: You create a new remote domain and set the domain name to App1. You create a new delivery agent connector and set the IsScopedConnectorproperty to \$true.Does this meet the goal?**A. Yes****B. No****Answer: B**

NEW QUESTION: 2What does the total cost of Application Ownership (TCAO) consist of?**A. The total costs of ownership including hardware support plus some amortization costs****B. The total annual costs of ownership including all platform costs, staffing and other internal costs****C. The total costs of ownership including software, hardware and services****D. The total annual costs of ownership including hardware support plus some amortization costs****Answer: D**

NEW QUESTION: 3Given:String value = getServletContext().getInitParameter("foo");in an HttpServlet and a web application deployment descriptor that contains:< context-param>< param-name>foo</param-name>< param-value>frodo</param-value>< /context-param> Which two are true? (Choose two.)**A. The foo initialization parameter CANNOT be set programmatically.****B. Compilation fails because getInitParameter returns type Object.****C. The foo initialization parameter can also be retrieved usinggetServletConfig().getInitParameter("foo").****D. The foo parameter must be defined within the <servlet> element of the deployment descriptor.****E. Compilation fails because ServletContext does NOT have a getInitParameter method.****F. The foo initialization parameter is NOT a servlet initialization parameter.****Answer: A,F**
