NEW QUESTION: 1 A method to transfer risk is to:**A.** move operations to another region**B.** Alignment with business operations**C.** purchase breach insurance**D.** Implement redundancy
Answer: C

NEW QUESTION: 2 Your customer wants you to install and configure MySQL on the customer's Oracle Linux 6 server with tarball binaries in the /app/mysql/ directory, where the bin directory is found at /app/mysql/bin and a data directory at /app/data. What are two correct and required server configurations, excluding redundant configuration entries, to build a MySQL instance supporting your customer's requirement?**A.** The configuration innodb_log_group_home_dir=/datadir is needed.**B.** The configuration datadir=/app/mysql/data is needed.**C.** The configuration basedir=/app/mysql is needed.**D.** The configuration basedir=/app/mysql/bin is needed.**E.** The configuration datadir=/app/data is needed.**F.** The configuration log-bin=/app/data is needed.**Answer: D,E**

NEW QUESTION: 3 A company is migrating its three-tier web application from on-premises to the AWS Cloud. The company has the following requirements for the migration process* Ingest machine images from the on-premises environment* Synchronize changes from the on-premises environment to the AWS environment until the production cutover* Minimize downtime when executing the production cutover* Migrate the virtual machines' root volumes

and data volumes Which solution will satisfy these requirements with minimal operational overhead?

A. Create an AWS CLI VM Import/Export script to migrate each virtual machine. Schedule the script to run incrementally to maintain changes in the application. Launch instances from the AMIs created by VM Import/Export Once testing is done, rerun the script to do a final import and launch the instances from the AMIs

B. Use AWS Server Migration Service (SMS) to create and launch a replication job for each tier of the application. Launch instances from the AMIs created by AWS SMS. After initial testing perform a final replication and create new instances from the updated AMIs

C. Use AWS Application Discovery Service and AWS Migration Hub to group the virtual machines as an application Use the AWS CLI VM Import/Export script to import the virtual machines as AMIs. Schedule the script to run incrementally to maintain changes in the application. Launch instances from the AMIs. After initial testing, perform a final virtual machine import and launch new instances from the AMIs.

D. Use AWS Server Migration Service (SMS) to upload the operating system volumes Use the AWS CLI import-snapshot command for the data volumes Launch instances from the AMIs created by AWS SMS and attach the data volumes to the instances After initial testing, perform a final replication, launch new instances from the replicated AMIs. and attach the data volumes to the instances

Answer: B Explanation: Explanation
