### NEW QUESTION: 1

企業のポートフォリオ内のすべてのアプリケーションには、開発用と本番用に別々のAWSアカウントがあります。セキュリティチームは、本番アカウントのルートユーザーとすべての午前1時のユーザーが、不要なサービスの特定のセットにアクセスできないようにしたいと考えています。この機能をどのように制御できますか？選んでください：**A.**

サービスへのアクセスを拒否するIAMポリシーを作成します。すべてのユーザーにポリシーmが割り当てられていることを確認する構成ルールを作成します。見つからない場合にポリシーを追加するLambda関数をトリガーします。**B.**

サービスへのアクセスを拒否するIAMポリシーを作成します。ポリシーをIAMグループに関連付け、このグループのすべてのユーザーとルートユーザーを参加させます。**C.**

サービスへのアクセスを拒否するサービス制御ポリシーを作成します。ルートアカウントにポリシーを適用します。**D.**

サービスへのアクセスを拒否するサービス制御ポリシーを作成します。組織単位ですべての本番アカウントを組み立てます。その組織単位にポリシーを適用します。**Answer: D**Explanation: ExplanationAs an administrator of the master account of an organization, you can restrict which AWS services and individual API actions the users and roles in each member account can access. This restriction even overrides the administrators of member accounts in the organization. When AWS Organizations blocks access to a service or API action for a member account a user or role in that account can't access any prohibited service or API action, even if an administrator of a member account explicitly grants such permissions in an IAM policy. Organization permissions overrule account permissions.Option B is invalid because service

policies cannot be assigned to the root account at the account level. Option C and D are invalid because IAM policies alone at the account level would not be able to suffice the requirement. For more information, please visit the below URL [id=docs\\_orgs\\_console https://docs.aws.amazon.com/IAM/latest/UserGuide/manage-attach-policy.html](https://docs.aws.amazon.com/IAM/latest/UserGuide/manage-attach-policy.html). The correct answer is: Create a Service Control Policy that denies access to the services. Assemble all production accounts in an organizational unit. Apply the policy to that organizational unit.
