Now, let us together study and have a look at the advantages of the AZ-800 test study engine, You can free download part of Administering Windows Server Hybrid Core Infrastructure actual dumps for a try.

NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1. Server1 runs Windows Server 2012 and has the Hyper-V server role installed. On Server1, you create and start a virtual machine named VM1. VM1 is configured as shown in the following table. You need to recommend a solution to minimize the amount of disk space used for the snapshot of VM1. What should you do before you create the snapshot?
A. Run the Convert-VHD cmdlet.
B. Convert disk1.vhd to a dynamically expanding disk.
C. Decrease the Minimum RAM.
D. Run the Stop-VM cmdlet.
Answer: B
Explanation: A dynamically expanding disk, on the other hand, is a VHD, which starts small -- usually at only a few kilobytes -- and expands as additional storage space is needed. It can only grow, however, to the size limit you designate in the setup wizard.
Incorrect: Not D: Convert-VHD Converts the format, version type, and block size of a virtual hard disk file.

NEW QUESTION: 2A user wants to list the IAM role that is attached to their Amazon EC2 instance. The user has login access to the EC2 instance but does not have IAM permissions. What should a solutions architect do to retrieve this information?
A. Run the following EC2 command `curl http://169.254.169.254/latest-/user-data/iam/info`
B. Run the following EC2 command `http://169.254.169.254/latest/dynamic/instance-identity/`
C. Run the following EC2 command `curl http://169.254.169.254/latest/meta-data/iam/info`
D. Run the following AWS CLI command `aws iam get-instance-profile --instance-profile-name ExampleInstanceProfile`
Answer: A

NEW QUESTION: 3The MOST important function of a risk management program is to:
A. minimize residual risk.
B. maximize the sum of all annualized loss expectancies (ALEs).
C. eliminate inherent risk.
D. quantify overall risk.
Answer: A
Explanation: Explanation/Reference: Explanation: A risk management program should minimize the amount of risk that cannot be otherwise eliminated or transferred; this is the residual risk to the organization. Quantifying overall risk is important but not as critical as the end result. Eliminating inherent risk is virtually impossible. Maximizing the sum of all ALEs is actually the opposite of what is desirable.
