NEW QUESTION: 1When installing vCenter Converter Standalone, why must an administrator perform a client-server installation instead of a local installation?
A. to convert virtual machines as well as physical machines
B. to manage conversion tasks remotely
C. to allow installation of the Converter agent on remote source machines
D. to hot clone physical or virtual machines
Answer: B
Explanation:Explanation/Reference:Explanation:Perform a Client-Server Installation in WindowsPerform a client-server installation so that you can create and manage conversion tasks remotelyReference:https://www.vmware.com/pdf/convsa_61_guide.pdf page 11

NEW QUESTION: 2A cost management plan should establish and document the various earned value rules of performance measurement. Along with defining the WBS to the level that the earned value analysis will be performed and establishing how earned value will be credited to the project (0-100, 0-50-100, and so on), which following rule is also recognized regarding performance measurement?
A. Determine the variance thresholds to be used in the project
B. Determine the formula for calculating the estimate at completion (EAC) for the project
C. Determine the code of accounts allocation provision for the WBS
D. Determine the formula for calculating the estimate to complete (ETC) for the project
Answer: B
Explanation:Three recognized earned value rules of performance measurement are to (1) determine the EAC calculation to be used on the project as tracking methodologies are specified and to provide a validity check on the bottom-up EAC, (2) establish the earned value measurement techniques (for example, weighted milestones, fixed formula or percent complete), and (3) define the WBS level at which the measurements of control accounts will be performed. Four methods can be used to calculate the EAC. [Planning] PMI@, PMBOK@ Guide, 2013, 199, 224

NEW QUESTION: 3At which three levels does Match Rules allow the Invoice Matching to occur? (Choose three.)
