Before clients buy our 1Z1-083 questions torrent they can download them and try out them freely, The purpose of providing demo is to let customers understand our part of the topic and what is the form of our 1Z1-083 study materials when it is opened?

What was your original intention of choosing a product?

NEW QUESTION: 1A. Option DB. Option BC. Option AD. Option C**Answer: C**

NEW QUESTION: 2Welcher der folgenden Schritte ist der wichtigste bei der Festlegung von Richtlinien für die Verwendung von Websites für soziale Netzwerke in einer Organisation?**A.** Führen Sie eine Schwachstellenbewertung durch**B.** Identifizieren Sie sichere Websites für soziale Netzwerke**C.** Definieren Sie akzeptable Informationen für die Veröffentlichung**D.** Disziplinarmaßnahmen wegen Nichteinhaltung festlegen**Answer: C**

NEW QUESTION: 3What is the main issue with media reuse?**A.** Purging**B.** Media destruction**C.** Degaussing**D.** Data remanence**Answer: D**
Explanation:Explanation/Reference:Explanation:The main issue with media reuse is data remanence, where residual information still resides on the media.Data Remanence is the problem of residual information remaining on the media after erasure, which may be subject to restoration by another user, thereby resulting in a loss of confidentiality. Diskettes, hard drives, tapes, and any magnetic or writable media are susceptible to data remanence. Retrieving the bits and pieces of data that have not been thoroughly removed from storage media is a common method of computer forensics, and is often used by law enforcement personnel to preserve evidence and to construct a trail of misuse. Anytime a storage medium is reused (and also when it is discarded), there is the potential for the media's information to be retrieved. Methods must be employed to properly destroy the existing data to ensure that no residual data is available to new users. The "Orange Book" standard recommends that magnetic media be formatted seven times before discard or reuse.Incorrect Answers:A: Degaussing is a method used to ensure that there is no residual data left on the media. This is not the main issue with media reuse.C: Media destruction as the name suggests is the destruction of media. This is not the main issue with media reuse.D: Purging is another method used to ensure that there is no residual data left on the media. This is not the main issue with media reuse.References:Krutz, Ronald L. and Russell Dean Vines, The CISSP Prep Guide: Mastering the CISSP and ISSEP Exams, 2nd Edition, Wiley Publishing, Indianapolis, 2004, p. 477

NEW QUESTION: 4The customer wants to buy a 1 node E870, and the requirements are:- two NICs- five HBAs- internal disk drives have redundant VIOSWhat can E870 add to meet their demands?**A.** A EXP24S (mode 2) connected to the integration of SAS controller.**B.** multiple redundant SAS controller and a EXP24S (mode 4)**C.** I/O drawer, a PCIE multiple redundant SAS controller and a EXP24S (mode 1)**D.** two PCIE I/O drawers, multiple redundant SAS controller and a EXP24S (model 2)**Answer: D**
