NEW QUESTION: 1You are working with two components: Component A and Component B. Component B has a slightly different behavior than component A.What is the best way to reuse the default script of component A in component B?**A.** Set a property in component B called sling:resourceSuperType with the path to component A and include the default script of component A in the default script in component B**B.** Set a property in component B called sling:resourceSuperType with the path to component A and omit the default script in component B**C.** Set a property in component B called sling:resourceSuperType with the path to component A and create an empty default script in component B**D.** Copy the default script from component A into component B**Answer: B**

NEW QUESTION: 2Which three options must be configured when deploying OSPFv3 for authentication?(Choose three.)**A.** IPsec transform-set**B.** authentication key**C.** security parameter index**D.** authentication method**E.** crypto map**F.** encryption algorithm**G.** encryption key**H.** IPsec peer**Answer: B,C,D**

NEW QUESTION: 3Your company implements an Agile development methodology.You plan to implement retrospectives at the end of each sprint.Which three questions should you include?

Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point. **A.** What could have gone better? **B.** Who performed well? **C.** What went well? **D.** Who should have performed better? **E.** What should we try next? **Answer: A, D, E** Explanation: Explanation Sprint retrospective meetings The sprint retrospective meeting typically occurs on the last day of the sprint, after the sprint review meeting. In this meeting, your team explores its execution of Scrum and what might need tweaking. Based on discussions, your team might decide to change one or more processes to improve its own effectiveness, productivity, quality, and satisfaction. This meeting and the resulting improvements are critical to the agile principle of self-organization. Look to address these areas during your team sprint retrospectives: * Issues that affected your team's general effectiveness, productivity, and quality. * Elements that impacted your team's overall satisfaction and project flow. * What happened to cause incomplete backlog items? What actions will the team take to prevent these issues in the future? Reference: <https://docs.microsoft.com/en-us/azure/devops/boards/sprints/best-practices-scrum>
