NEW QUESTION: 1In Microsoft Dynamics AX 2012, which of the following describes a reported product?**A.** An item that is regulated by national, regional, and local authorities.**B.** An item with distribution that is limited or constrained by a government authority.**C.** An item that requires continuous compliance.**D.** An item that is sourced through intercompany planning.**Answer: A**

NEW QUESTION: 2You are a VMware consultant who has been hired to take over a mismanaged VMware vSphere 5 platform estate. You are presented with the vCenter administrator password and given the following information.1.The system has full production support from VMware.2.The platform has been suffering from performance problems for two weeks.3.No documentation exists.Your role is to design and implement a platform that meets the following requirements:-R001: Stable for current workloads -R002: Supportable by operations staffWhich of the following discovery methods should be used?**A.** Passive discovery **B.** Active discovery**Answer: A**Explanation:There are two types of discovery methods:Active discovery can run processes which are detrimental and can impact a system, and normally requires an agent.With passive discovery, data is obtained in a non-impactful, non-intrusive manner with no agents.Data such as this normally needs more experience to obtain and interpret/present.

NEW QUESTION: 3After being notified of an issue with the online shopping cart, where customers are able to arbitrarily change the price of listed items, a programmer analyzes the following piece of code used by a web based shopping cart.SELECT ITEM FROM CART WHERE ITEM=ADDSLASHES(\$USERINPUT);The programmer found that every time a user adds an item to the cart, a temporary file is created on the web server /tmp directory. The temporary file has a name which is generated by concatenating the content of the \$USERINPUT variable and a timestamp in the form of MM-DD- YYYY, (e.g. smartphone-12-25-2013.tmp) containing the price of the item being purchased.Which of the following is MOST likely being exploited to manipulate the price of a shopping cart's items?**A.** Input validation**B.** Session hijacking**C.** SQL injection**D.** TOCTOU**Answer: C**

NEW QUESTION: 4The middle value when values are arranged in order from high to low is which of the following?**A.** Median**B.** Mean**C.** Moving average**D.** Mode**Answer: A**Explanation:Explanation/Reference:Answer option D is correct.The median is the middle value when values are arranged from high to low. Half the numbers are higher than the median; half are lower. The mean (C) is calculated by adding up the values and dividing by the number of values. The mode (A) is the value that occurs most frequently in a set of numbers. The moving average (B) keeps data current by dropping the oldest data when new data is added.Chapter: Core Knowledge Requirements for HR ProfessionalsObjective: Review Questions
