NEW QUESTION: 3 Which of the following statements describe the network shown in the graphic? (Choose two.) **A. There are four broadcast domains in the network. B. There are six broadcast domains in the network. C. There are seven collision domains in the network. D. There are five collision domains in the network. E. There are four collision domains in the network. F. There are two broadcast domains in the network.****Answer: C, F****Explanation:** Only router can break up broadcast domains so in the exhibit there are 2 broadcast domains: from e0 interface to the left is a broadcast domain and from e1 interface to the right is another broadcast domain ->. Both router and switch can break up collision domains so there is only 1 collision domain on the left of the router (because hub doesn't break up collision domain) and there are 6 collision domains on the right of the router (1 collision domain from e1 interface to the switch + 5 collision domains for 5 PCs in Production) ->.
